ACKNOWLEDGEMENT

Neither gilded phrases nor perfunctory rhetoric can ever fathom the acumen or affection, the guidance or encouragement of my mentor and worthy supervisor S. Gurbakhash Singh Sandhu, Reader, Department of Physical Education, Panjab University, Chandigarh, that I have drawn all through. Words elude me in thanking him.

I am thankful to Dr. N.S. Mann, Lecturer, Department of Physical Education, Panjab University, Chandigarh, and Mr. P.N. Pimpley, Professor, Department of Sociology, Panjab University, Chandigarh, for their able guidance, keen interest and valuable suggestions, which enabled me to complete this research work.

I wish to express my gratitude to all the Sports Directorates of North-West Universities, concerned colleges, D.P.E’s, Lecturer’s in Physical Education and coaches for permitting me to conduct extensive experiments. I also wish to thank all the athletes, for giving me their valuable time and patience during the experiments.

Thanks are also due to my friends Pamela and Satwant Kaur Mann for their moral support and encouragement throughout this study.

I express my thanks to my husband, parents and in-laws for their co-operation, co-ordination, incessant inspiration and unstinted moral support which they rendered to me throughout the course of present study.

(SUSHILA YADAV)
