LIST OF ABBREVIATIONS

INTRODUCTION

1-42

Heterocycles

1

β -lactam antibiotics (A review)

3

Some interesting aspects of chemistry and biological activity of β -lactam compounds

15

Synthetic Methodologies

25

PRESENT WORK

43-146

Chapter I : Synthesis of Some New β -Lactams and Oxazolidines from Ethanolimine Derivatives

44

Chapter II : Synthesis of β -Lactams and Other Heterocycles from N-(3-Hydroxypropyl)imines and Other Related Imines

63

Chapter IIIA: Attempts Towards Enantiospecific Synthesis of Substituted β -Lactams from D-Glyceraldehyde Acetonide and Various Aliphatic Amines

84

Chapter IIIB: Diastereoselective Synthesis of 1,3-Disubstituted, 1,2,3,4 Tetrahydro β -Carbolines Using Pictet-Spengler Reaction

96

Chapter IVA: Synthesis of Benzothiazoles and Benzothiazolines from o-Aminothiophenol

112

Chapter IVB: Synthesis of Benzimidazoles Under Mild Reaction Conditions

119

Chapter IVC: Diastereoselective Synthesis of Benzofused Heterocycles from R-Glyceradehyde Acetonide

125

Chapter V : Evaluation of Antibacterial Activity of Some Newly Synthesized β -Lactams and Other Heterocycles

133

SUMMARY

147-158

REFERENCES

159-182
