Abstract

CORRELATION BETWEEN EDUCATIONAL ENVIRONMENT AND EDUCATIONAL SATISFACTION OF TEACHERS AND STUDENTS

By

Mehdi Zare

The goal of study was investigating the relationship between educational environment and students and teachers satisfaction in Pune and Shiraz universities. Statistical population was all Pune and Shiraz students and teachers. By multistage cluster random 382, Pune students and 378 Shiraz students and 322 Pune teachers and 260 Shiraz teachers were selected. The instruments of this study included three scales included:

1- Physical Education Environmental Survey (Hil& Hulbert, 2007)

2- Course Experience Questionnaire (CEQ), (Ramsden, 1991)

3- Faculty Satisfaction questionnaire (Serafin, 1991)

after calculating validity and reliability distributed and analyzed. The results indicated: 1- There is significant difference between Indian and Iranian students’ perception of educational environment 2- There is significant difference between Indian and Iranian students’ satisfaction 3- There is significant difference between Indian and Iranian teachers’ perception of educational environment. 4- There is significant difference between Indian and Iranian teachers’ job satisfaction. 5- There is significant relationship between Indian and Iranian students’ perception of educational environment and their satisfaction.

Key words: Educational environment, Educational Satisfaction, Student, teacher.
