For any research, especially in interdisciplinary approach, irrespective of its magnitude, host of factors are associated. I am thankful to a great number of people much greater than can be enumerated and named here, to my teachers, colleagues, friends and patients.

I am extremely grateful to Dr. H.N. Murthy, Associate Professor and Head of the Department of Psychology, All India Institute of Mental Health, Bangalore, for his valuable guidance, immense encouragement and constructive suggestions for the design and execution of this work. It would be no exaggeration to say that without his guidance and supervision such a work with interdisciplinary approach would not have been accomplished.

I wish to express my gratitude to Dr. R.M. Varma, Director, All India Institute of Mental Health and Ex-Officio Superintendent, Government Mental Hospital, Bangalore, for permitting me to carry out this research at this Institute.

I am thankful to Dr. G.N. Narayana Reddy, Additional Superintendent, Mental Hospital, Bangalore, for allowing me to carry out this work on the patients of the hospital and making available all the facilities needed for it.

I acknowledge with gratitude the help rendered by Dr. S.M. Chennabasavanna, Deputy Superintendent, Mental Hospital, Bangalore, for taking the responsibility as the Chief Psychiatrist of the unit in selecting patients as well as supervising the Sedation Threshold experiment. He was the medical personnel responsible for prescribing the drugs for these patients and their follow up.
I am grateful for the assistance provided by Dr. D.L. Ramachandran, MBBS., Dr. M.G. Ponniah, MBBS., and Dr. Gopalakrishnan, MBBS., during the Sedation Threshold experiment conducted under the major supervision of Dr. S.M. Chennabasavanna.

My sincere thanks are also due to Dr. H.S. Narayanan and Dr. V. Venkataramaih, Psychiatrists, Mental Hospital, Bangalore, for their permission to take patients from their units as well as in their help for categorizing the patients into independent diagnostic groups.

My thanks are due in no small measure to the patients who willingly cooperated during this investigation. It is needless to mention that without their cooperation this venture would have been impossible.

I wish to express my gratitude to all the staff members, Department of Psychology, All India Institute of Mental Health, Bangalore, for their interest, cooperation and encouragement during this work.

My thanks are due to Mr. Panishayee, Principal, National College, Bangalore, for providing us the Psychogalvanoscope apparatus from his college for this work.

Mr. V.B. Nanda Gopal, M.A., needs special mention for his technical helps during laboratory investigations. I am thankful to him.

One of my greatest debt is due to Dr. Ashim Kumar Majumdar, MBBS., for his immense help in several ways throughout the tenure of this research.

I am grateful to Dr. Sukdev Narayan, MBBS., for the help he has rendered during this work.

(Bangalore University Library, Jnana Bharathi)
For the statistical analysis of the data, my thanks are due to Mr. V.C. Kalia Perumal, Lecturer in Statistics, All India Institute of Mental Health, Bangalore. Further, in this regard, I would like to express my gratitude to Mr. N.S. Narasimha Murthy, Statistical assistant, Ayurvedic Research Unit (C.C.R.I.M.H.), All India Institute of Mental Health, Bangalore, for the help he has rendered to me during the statistical treatment of the data as well as its verification.

I am thankful to my friends and colleagues, Mr. G. Nardev, M.A., D.P.S.W., Mr. R.N. Anantharaman, M.A., Mr. S. Thyagarajan, M.A., Dr. P.V. Nayak, M.E.B.S., D.P.M., and Staff Nurses, Mental Hospital, Bangalore, for their help in many respects during this work.

I am thankful to all the authors who have sent the reprints of several articles, on request, so as to enable me to have essential information in this regard.
