Acknowledgement

I am grateful to the Almighty for His blessing, guidance in the right path and giving me strength to face problems, sound health and peace of mind to complete this thesis smoothly.

I would like to give heartfelt gratitude to my guide, Dr. Narayan Chandra Talukdar, Director, Institute of Bioresources and Sustainable Development, Takyelpat, Imphal, for his excellent supervision providing me the opportunity to carry out this research and unending motivation to keep moving forward. My experiences with him during the past five year have made me understand what exactly a student gain from a passionate teacher.

I would also like to thank my co-guide, Professor M. C. Kalita, Department of Biotechnology, Gauhati University, Guwahati, for his kind support and help.

My study in this research would not be possible without the financial assistance of Department of Science and Technology as well as Department of Biotechnology, Govt. of India, for which I am truly grateful.

I would also like to thank our Institute, IBSD, for providing me all the facilities required for my research. I will remain forever grateful to my dear research colleagues, K. Chandradev Sharma, Dr. W. Sayanika, Elizabeth Th., H. Surnalata, Yugal Kishore, N. Kiran Singh and Y. Dhaneshore Singh, for their help and corporation during the research period. I am personally indebted to members of Imphal Municipal Council for providing me information for Imphal market as well as waste disposal areas.

I do not know which words could describe my gratitude towards my family for the moral and financial support, valuable suggestion and continuous encouragement during the period of my whole research. I also express my special thanks to my husband, Khumanthem Shantikumar Singh, for his support and inspiration during the period of my research work.

Lastly, but not the least, I am thankful to one and all who directly or indirectly extended their corporation to me in the completion of my research work. Words of thanks are beyond expression.
