ACKNOWLEDGEMENTS

It has been my proud privilege to work under Dr. J.B. Shrivastav, M.D., D.B.(Lond) formerly Director, Central Research Institute, Kasauli, and later Director, National Institute of Communicable Diseases, Delhi and now Additional Director General of Health Services, New Delhi, who has been the main source from whom I derived inspiration, guidance and encouragement for undertaking this study. He spent considerable time and effort in helping me to plan the details of the study. His valuable suggestions and advice throughout the course of the study and his constant encouragement and invaluable guidance have enabled me to complete my thesis. I owe him a deep gratitude for all this.

I offer my sincere thanks to Dr. A.K. Thomas, Director, Central Research Institute, Kasauli, for affording all the possible help, guidance, very valuable criticism and suggestions which have gone a long way in improving the scope of the work.

This work has also been possible due to the valuable help, guidance and advice of several teachers, colleagues and friends. Amongst them, I am highly grateful to Dr.W.B.Redmond, Chief, Tuberculosis Research Laboratories, Veterans Administration Hospital, Atlanta, U.S.A. and Dr.E.M.Manckiewicz, Director of Laboratories, Royal Edwards Chest Hospital, Montreal, Canada, who helped me a great deal with several important details of the study, during my visit to their laboratories.
My grateful thanks are also due to Dr. N.P. Gupta, Head, Department of Microbiology, Patel Chest Institute, Delhi; Dr. M.L. Chitkara, Professor of Pathology and Bacteriology, Medical College, Amritsar; and Dr. S.C. Agarwal, Head, Microbiology Department, Post-graduate Institute of Medical Education and Research, Chandigarh, for valuable suggestions.

I would also like to record my deep appreciation of the encouragement I received from Dr. D.A. Mitchison and Dr. J.B. Selkon, from the Postgraduate Medical School, London, with whom I had the privilege to work for nearly four years at the Tuberculosis Chemotherapy Centre, Madras.

I am extremely indebted to Mr. Dev Dutt Atri, Mr. Maya Dutt Sharma and Mr. Om Parkash Kaushak for their skilled and sincere technical assistance throughout my work.

My thanks are also due to the following who supplied me with the phages and bacterial strains: Dr. Sula, Chief, W.H.O. Tuberculosis Reference Laboratory, Prague, Czechoslovakia; The Curator, National Collection of Type Culture, London; Dr. W.B. Redmond, Chief, Tuberculosis Research Laboratories, Veterans Administration Hospital, Atlanta, U.S.A.; Dr. E.M. Manckiewicz, Director of Laboratories, Royal Edwards Chest Hospital, Montreal, Canada; Dr. T. Tokunaga, National Institute of Health, Tokyo, Japan; Dr. E.H. Runyon, Chief Microbiology Research Laboratory, V.A. Hospital, Utah, U.S.A.; Dr. Marjorie M. Smith, Bacteriologist, Trudeau Institute, Inc. Medical Research Laboratories, Saranac Lake, New York.
Dr. J.H. Bates, Chief, Medical Service, Veterans Administration, Little Hock, Arkansas, U.S.A.; Dr. Inga Baess, Statens Serum Institute, Copenhagen; Dr. J. Frimodt-Møller and Dr. K.G. Kulkarni, Tuberculosis Research Unit, Madanapalle; Prof. Paul Hauduroy, Institute of Bacteriologie, d'Hygiène et de virologie, Lausanne, Switzerland; Dr. H.M. Singh, Director, Indian Veterinary Institute, Muktshwar; Dr. J.L. Bhatia, Professor of Tuberculosis, Medical College, Amritsar; Dr. K. Padmanabha Rao, National Tuberculosis Institute, Bangalore; Dr. S.P. Tripathi and Dr. P.R.J. Gangadharam, Tuberculosis Chemotherapy Centre, Madras; Dr. H.K. Dave, Assistant Director, Haffkine Institute, Bombay; Dr. Narasimohan, Bacteriologist, T.B. Clinic, Delhi and Dr. H.N. Sehgal, Ex-Medical Superintendent, Lady Linlithgow Sanatorium, Kasauli.

I am also indebted to Dr. S.N. Chatterjee, Associate Professor & Head Biophysics Department, Calcutta School of Tropical Medicine, for kindly taken electron photomicrograph.

Central Research Institute, Kasauli.

(A.L. Bhatia)
Deputy Director.
