It is a matter of great pleasure and pride to have worked with Dr. K.K. Nanda, Senior Professor of Plant Physiology, a Scientist of International fame, whose esteemed guidance, constant touch, enlivening discussions and unflinching interest encouraged me not only during the course of this investigation but has also inculcated in me the habit of keen observation and deep thinking which will be an asset in my future career. Apart from his superb acumen and treasure of knowledge, his benevolent behaviour and fatherly affection has induced in me deep worship towards my erudite and revered teacher. Along with the long period of research, regular seminars held under his Presidentship has kept me in touch with the most recent topics on the subject.

In the benediction of Dr. H.S. Sohi, the present Chairman I have found the fruition of my good fortune and I do thank him most heartily with all the sincerity I can command for providing me with the best laboratory facilities.

My special thanks are due to my sincere friends Mrs. Sudesh, Lecturer in Maths Department, Miss Madhu Sharma and Mrs. Sarita, research scholars in Botany Department for trotting and hobnobbing with me and for sharing my sentiments, multiplying my joys and dividing my sorrows for the sake of my pleasures for the whole period of research work. That was a lot of encouragement and a psychological shelter to my feelings of limping behind the others timewise.

I am also grateful to my companions Mrs. Reeta Sharma, Misses Pushap and Renu Trehan in whose company I always felt pleasant.

It sounds rather unconventional to make a mention of one’s gratitude to one’s parents and relatives on such occasions. I venture to be unconventional in this regard because I feel convinced that it is basically the inspiration and encouragement from my beloved father, mother, brothers and bhabijis who besides kindling me, persuaded me to receive higher education and to take keen interest in seeing me accomplishing this work. It has made all the difference that they stood by me with incredible patience, despite my vicissitudes, throughout my long research period problems and kept me away from the house hold work.

I proudly mention my irredeemable debt I owe to my mother-in-law and my husband for their keen interest in goading me to achieve success in the accomplishment of this work.

I am also thankful to my lab-mates specially Drs. G.L. Bansal and Surinder Sharma for their help whenever
asked for.

My thanks are also due to Sh G.S. Guleria for typing the manuscript efficiently.

I am also thankful to Mr. Ramdhan, Mali of our laboratory, who helped me sincerely in the field work for filling the pots in time.

Financial assistance in the form of Senior Research Fellowship from CSIR, New Delhi is gratefully acknowledged.
