ACKNOWLEDGEMENTS

It is with great pleasure I record my deep sense of gratitude to my professor and supervisor Dr. K. Varadacharjanar, for suggesting the topic under study here, for numerous fruitful discussions during the course of my investigation and for his constant encouragement and valuable guidance throughout the period of my study. I am all the more indebted to him for setting apart his valuable time to go through every word of my manuscripts and for making useful suggestions.

I am also deeply grateful to Prof. T.P. Heenakishundaram for permitting me to make use of his personal library and to Dr. V.I. Subramoniam for periodic suggestions through correspondence and for personal discussions connected with my work.

I thank the Vice-Chancellor and the authorities of the University of Madras, for having given me all facilities to complete this work successfully and the U.C.C. for having awarded me a scholarship during the tenure of my research.

To Miss. K. Rajeswari, Mr. P. Venkataramani and Mr. A. Vincent Jayakumar, I owe my heartfelt thanks for all the service they rendered, while preparing the thesis.
