ACKNOWLEDGEMENTS

Unlike olden days, knowledge that has been treasured throughout the world for ages in different forms, individuals, organizations, experiences, events and incidences is certainly available to those researchers who pursue it with strong desire, devotion and dedication. While doing so, every individual, every organization and every medium that becomes instrumental in delivering the knowledge are always remembered by the researchers in the form of expressed or hidden gratitude.

I must acknowledge with thanks all those individuals and organizations that helped me in completing the work presented through this thesis. However, it will be a sort of ingratitude on my part if I do not mention some prominent names of the persons that have spent their time, resources and shared their experiences with me and shown me the exact path of knowledge leading to complete this work with satisfaction.

At the outset, a very special acknowledgement to my learned Guide Dr. D. K. Sinha, D.Y. Patil College of Engineering, Pune for his remarkable talents and untiring efforts in guiding and supervising my work at each stage critically and carefully from time to time without any hesitation and who helped me to complete this work irrespective of all odds.

My deep gratitude goes to Dr. G. K. Shirude, Head of the Research Centre for extending his help in giving admission in Research Center at S. P. Mandali’s Naralkar Institute of Career Development & Research, Pune for the present study and making available required resources.

I have a privilege to thank from the bottom of my heart the Founder-President of Sinhgad Technical Education Society and a visionary Prof. M. N. Navale, one of the reverent personalities in the field of higher education in Maharashtra. He made all sorts of resources available to me that I required for completing my thesis including Library Books, Journals, Magazines and such other resources absolutely free of charge, besides time required during past three years for surveys and interviews.
The present work would not have taken shape without the valuable guidance of Dr. Parag C. Kalkar, Director of S.I.B.A.C.A., Lonavala. His timely and resourceful guidance and encouragement have made me march towards the academic success. All my office staff members and students pursuing management courses in our Institute encouraged me to proceed further with my target in respect of achieving knowledge in the present area.

I also recognize and express my thanks to Dr. Shailesh Kasande, Dr. Amod Markale and Dr. Pratiksha Wable for sharing their specialized knowledge and expert advice in completing this work.

Last but not the least; my thanks are due to my family. My father Dr. Shriram S. Shimpi has been a great support and inspiration to me. He taught me the values of hard work and pursuit for excellence and imbibed ‘never die’ spirit in me. My mother Dr. Suryakanta S. Shimpi, my wife Sneha Shimpi and my sister Sharayu Shimpi have encouraged me from time to time and helped me directly or indirectly to complete this work.
