Chapter 2

Aims and Objectives
Chapter 2
Aims and Objectives

Aims:

• To study the health care systems in higher professional educational institutions, nationally and internationally.

• To compare the health care delivery system implemented at the focal institution of the researcher with the health care delivery systems implemented at other higher professional educational institutions on the basis of the questionnaire and cite the healthcare delivery model operational at the focal institution of the researcher, as a case study.

Objectives:

• To obtain a baseline information on healthcare systems operational at different higher professional educational institutions in India and globally.

• Describe in detail the healthcare model of the focal institution of the researcher. Showcase the model at the focal institution of the researcher as one of the comprehensive healthcare models on campus of an educational institution in India.

• To recommend future policies, and strategic planning with a view to improve the healthcare systems at higher professional educational institutions & universities.
