</table>
4.9 Karl Pearson co-efficient correlation among various dimensions of awareness on CDD WATSAN programme in relation to earning members, monthly income of the respondents

4.10 'z' Test between awareness on the various dimensions of CDD WATSAN programme in relation to saving habits of the respondents

4.11 'z' Test between awareness on the various dimensions of CDD WATSAN programme in relation to loan received by the respondents

4.12 Decision making Levels of husband, wife or both

4.13 Levels of decision making of the respondents

4.14 Karl Pearson co-efficient of correlation between socio economic conditions and decision making of the respondents

4.15 Association of Religion, Caste and education with dimensions of decision making of the respondents

4.16 'Z' Test for dimensions of decision making in relation to the occupational status of the respondents

4.17 Chi-Square Test for decision making in relation to educational status of the respondents

4.18 Chi-Square Test for decision making in relation to family income of the respondents

4.19 'Z' Test for decision making in relation to savings habit of the respondents

4.20 Levels of self empowerment of the respondents

4.21 One Way Analysis of Variance among various dimensions of self empowerment in relation to religion of the respondents
4.22 One Way Analysis of Variance among various dimensions of self empowerment in relation to caste structure of the respondents

4.23 One Way Analysis of Variance among various dimensions of self empowerment in relation to the areas in which the respondents live

4.24 One Way Analysis of Variance among various dimensions of self empowerment in relation to age group of the respondents

4.25 One Way Analysis of Variance among various dimensions of self empowerment in relation to educational qualification of the respondents

4.26 One Way Analysis of variance among various dimensions of self empowerment in relation to occupational status of the respondents

4.27 Karl Pearson co-efficient of correlation among various dimensions of self empowerment in relation to earning members, monthly income and family income of the respondents

4.28 'Z' Test among various dimensions of self empowerment in relation to saving habits of the respondents

4.29 'Z' Test among various dimensions of self empowerment in relation to loan received by the respondents

4.30 Levels of group empowerment

4.31 One Way Analysis of Variance among various dimensions of group empowerment in relation to religion of the respondents

4.32 One Way Analysis of Variance among various dimensions of group empowerment in relation to caste structure of the respondents
4.33 One Way Analysis of Variance among various dimensions of group empowerment in relation to the areas in which the respondents live

4.34 One Way Analysis of Variance among various dimensions of group empowerment in relation to age group of the respondents

4.35 One Way analysis of Variance among various dimensions of group empowerment in relation to educational qualification of the respondents

4.36 'Z' Test for various dimensions of group empowerment in relation to occupational status of the respondents

4.37 Association of various dimensions of group empowerment in relation to earning members, monthly income and family income of the respondents

4.38 'Z' Test among various dimensions of group empowerment in relation to saving habits of the respondents

4.39 'Z' Test for various dimensions of group empowerment in relation to loan received by the respondents

4.40 Levels of overall empowerment

4.41 One Way Analysis of Variance among various dimensions of overall Empowerment in relation to religion of the respondents

4.42 One Way Analysis of Variance among various dimensions of overall empowerment in relation to caste structure of the respondents

4.43 One Way Analysis of Variance among various dimensions of overall empowerment in relation to the areas in which the respondents live
4.44 One Way Analysis of Variance among various dimensions of overall empowerment in relation to age group of the respondents

4.45 One Way analysis of Variance among various dimensions of overall empowerment in relation to educational qualification of the respondents

4.46 'Z' Test for various dimensions of overall empowerment in relation to occupational status of the respondents

4.47 Karl Pearson co-efficient correlation among various dimensions of overall empowerment in relation to earning members, monthly income and family income of the respondents

4.48 'Z' Test for various dimensions of overall empowerment in relation to savings habit of the respondents

4.49 'Z' Test for various dimensions of overall empowerment in relation to loan amount received
