<tbody>
<tr>
<td>1.1</td>
<td>Acid unitage of <em>Aspergillus niger</em> strains</td>
</tr>
<tr>
<td>1.2</td>
<td>Screening of <em>A. niger</em> strains for citric acid production in SmF and SSF systems</td>
</tr>
<tr>
<td>2.1</td>
<td>Citric acid production by <em>A. niger</em> RCNM 17 in SmF using Shu and Johnson's medium</td>
</tr>
<tr>
<td>2.2</td>
<td>Citric acid production by <em>A. niger</em> RCNM 17 in LSF using Shu and Johnson's medium</td>
</tr>
<tr>
<td>2.3</td>
<td>Citric acid production by <em>A. niger</em> RCNM 17 in SSF using sugarcane bagasse impregnated with Shu and Johnson's medium</td>
</tr>
<tr>
<td>2.4</td>
<td>Time course of citric acid production by <em>A. niger</em> RCNM 17 in SSF using sugarcane bagasse impregnated with Shu and Johnson's medium</td>
</tr>
<tr>
<td>3.1</td>
<td>Citric acid production by <em>A. niger</em> RCNM 17 in basal CWB medium</td>
</tr>
<tr>
<td>3.2</td>
<td>Effect of particle size on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.3</td>
<td>Influence of initial pH on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.4</td>
<td>Influence of initial moisture level of the substrate on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.5</td>
<td>Influence of iron on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.6</td>
<td>Influence of copper on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.7</td>
<td>Influence of zinc on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.8</td>
<td>Influence of manganese on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.9</td>
<td>Influence of magnesium on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.10</td>
<td>Influence of phosphate on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.11</td>
<td>Influence of combination of metal ions on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.12</td>
<td>Effect of different carbohydrates source on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.13</td>
<td>Effect of different concentrations of sucrose on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.14</td>
<td>Effect of different nitrogen sources on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.15</td>
<td>Effect of different concentration of ammonium nitrate on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.16</td>
<td>Effect of different lower alcohols on Citric acid production by <em>A. niger</em></td>
</tr>
<tr>
<td>Section</td>
<td>Description</td>

</tr>
<tr>
<td>3.17</td>
<td>Effect of different lower alcohols on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.18</td>
<td>Effect of different concentrations of methanol on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.19</td>
<td>Effect of α-amylase on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.20</td>
<td>Effect of different lipids on citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.21</td>
<td>Effect of different concentrations of coconut oil on Citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.22</td>
<td>Production of citric acid by <em>A. niger</em> RCNM 17 in different media</td>
</tr>
<tr>
<td>3.23</td>
<td>Effect of inoculum level on citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.24</td>
<td>Effect of age of inoculum on citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.25</td>
<td>Effect of incubation temperature on citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.26</td>
<td>Effect of autoclaving time on citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.27</td>
<td>Effect of quantity of medium on citric acid production by <em>A. niger</em> RCNM 17 in CWB medium</td>
</tr>
<tr>
<td>3.28</td>
<td>Effect of time course of citric acid production by <em>A. niger</em> RCNM 17 in CWB medium under optimal conditions</td>
</tr>
<tr>
<td>3.29</td>
<td>Production of different extra cellular enzymes by <em>A. niger</em> RCNM 17 in CWB medium under optimal conditions</td>
</tr>
<tr>
<td>3.30</td>
<td>RBSSF of citric acid by <em>A. niger</em> RCNM 17 in CWB medium with different inoculum levels</td>
</tr>
<tr>
<td>3.31</td>
<td>RBSSF of citric acid by <em>A. niger</em> RCNM 17 in CWB medium with standardized inoculum</td>
</tr>
<tr>
<td>4.1</td>
<td>SSF of citric acid <em>A. niger</em> RCNM 17 in basal deoiled rice bran (DRB) medium</td>
</tr>
<tr>
<td>4.2</td>
<td>Effect of pH on SSF of citric acid <em>A. niger</em> RCNM 17 in DRB medium</td>
</tr>
<tr>
<td>4.3</td>
<td>Effect of initial substrate moisture content on SSF of citric acid <em>A. niger</em> RCNM 17 in DRB medium</td>
</tr>
<tr>
<td>4.4</td>
<td>Effect of trace elements on SSF of citric acid <em>A. niger</em> RCNM 17 in DRB medium</td>
</tr>
<tr>
<td>4.5</td>
<td>Effect of different concentrations of ammonium nitrate on SSF of citric acid <em>A. niger</em> RCNM 17 in DRB medium</td>
</tr>
<tr>
<td>4.6</td>
<td>Effect of different concentrations of sucrose on SSF of citric acid <em>A. niger</em> RCNM 17 in DRB medium</td>
</tr>
<tr>
<td>4.7</td>
<td>Effect of α-amylase on SSF of citric acid <em>A. niger</em> RCNM 17 in DRB medium</td>
</tr>
<tr>
<td>4.8</td>
<td>Effect of methanol (3%v/w) on SSF of citric acid <em>A. niger</em> RCNM 17 in DRB medium</td>
</tr>
<tr>
<td>4.9</td>
<td>Effect of autoclaving time on SSF of citric acid <em>A. niger</em> RCNM 17 in DRB medium</td>
</tr>
<tr>
<td>4.10</td>
<td>Effect of inoculum size on SSF of citric acid <em>A. niger</em> RCNM 17 in DRB medium</td>
</tr>
<tr>
<td>4.11</td>
<td>Time course SSF of citric acid by <em>A. niger</em> RCNM 17 in DRB medium under optimal conditions</td>
</tr>
<tr>
<td>5.1</td>
<td>SSF of citric acid <em>A. niger</em> RCNM 17 in basal areca husk (AH) medium</td>
</tr>
<tr>
<td>5.2</td>
<td>Effect of pH on SSF of citric acid <em>A. niger</em> RCNM 17 in AH medium</td>
</tr>
<tr>
<td>5.3</td>
<td>Effect of initial substrate moisture content on SSF of citric acid <em>A. niger</em> RCNM 17 in AH medium</td>
</tr>
<tr>
<td>5.4</td>
<td>Effect of trace elements on SSF of citric acid <em>A. niger</em> RCNM 17 in AH medium</td>
</tr>
<tr>
<td>5.5</td>
<td>Effect of different concentrations of ammonium nitrate on SSF of citric acid <em>A. niger</em> RCNM 17 in AH medium</td>
</tr>
<tr>
<td>5.6</td>
<td>Effect of different concentrations of sucrose on SSF of citric acid <em>A. niger</em> RCNM 17 in AH medium</td>
</tr>
<tr>
<td>5.7</td>
<td>Effect of methanol (3%v/w) on SSF of citric acid <em>A. niger</em> RCNM 17 in AH medium</td>
</tr>
<tr>
<td>5.8</td>
<td>Effect of autoclaving time on SSF of citric acid <em>A. niger</em> RCNM 17 in AH medium</td>
</tr>
<tr>
<td>5.9</td>
<td>Effect of inoculum size on SSF of citric acid <em>A. niger</em> RCNM 17 in AH medium</td>
</tr>
<tr>
<td>5.10</td>
<td>Time course SSF of citric acid by <em>A. niger</em> RCNM 17 in AH medium under optimal conditions</td>
</tr>
<tr>
<td>6.1</td>
<td>SSF of citric acid <em>A. niger</em> RCNM 17 in basal coffee husk (CH) medium</td>
</tr>
<tr>
<td>6.2</td>
<td>Effect of pH on SSF of citric acid <em>A. niger</em> RCNM 17 in CH medium</td>
</tr>
<tr>
<td>6.3</td>
<td>Effect of initial substrate moisture content on SSF of citric acid <em>A. niger</em> RCNM 17 in CH medium</td>
</tr>
<tr>
<td>6.4</td>
<td>Effect of trace elements on SSF of citric acid <em>A. niger</em> RCNM 17 in CH medium</td>
</tr>
<tr>
<td>6.5</td>
<td>Effect of different concentrations of ammonium nitrate on SSF of citric acid <em>A. niger</em> RCNM 17 in CH medium</td>
</tr>
<tr>
<td>6.6</td>
<td>Effect of different concentrations of sucrose on SSF of citric acid <em>A. niger</em> RCNM 17 in CH medium</td>
</tr>
<tr>
<td>6.7</td>
<td>Effect of methanol (3%v/w) on SSF of citric acid <em>A. niger</em> RCNM 17 in CH medium</td>
</tr>
<tr>
<td>6.8</td>
<td>Effect of autoclaving time on SSF of citric acid <em>A. niger</em> RCNM 17 in CH medium</td>
</tr>
<tr>
<td>6.9</td>
<td>Effect of inoculum size on SSF of citric acid <em>A. niger</em> RCNM 17 in CH medium</td>
</tr>
<tr>
<td>6.10</td>
<td>Time course SSF of citric acid by <em>A. niger</em> RCNM 17 in CH medium under optimal conditions</td>
</tr>
<tr>
<td>7.1</td>
<td>SSF of citric acid <em>A. niger</em> RCNM 17 in basal coconut oil cake (COC) medium</td>
</tr>
<tr>
<td>7.2</td>
<td>Effect of pH on SSF of citric acid <em>A. niger</em> RCNM 17 in COC medium</td>
</tr>
<tr>
<td>7.3</td>
<td>Effect of initial substrate moisture content on SSF of citric acid <em>A. niger</em> RCNM 17 in COC medium</td>
</tr>
<tr>
<td>7.4</td>
<td>Effect of trace elements on SSF of citric acid <em>A. niger</em> RCNM 17 in COC medium</td>
</tr>
<tr>
<td>7.5</td>
<td>Effect of different concentrations of ammonium nitrate on SSF of citric acid <em>A. niger</em> RCNM 17 in COC medium</td>
</tr>
<tr>
<td>7.6</td>
<td>Effect of different concentrations of sucrose on SSF of citric acid <em>A. niger</em> RCNM 17 in COC medium</td>
</tr>
<tr>
<td>7.7</td>
<td>Effect of methanol (3%v/w) on SSF of citric acid <em>A. niger</em> RCNM 17 in COC medium</td>
</tr>
<tr>
<td>7.8</td>
<td>Effect of autoclaving time on SSF of citric acid <em>A. niger</em> RCNM 17 in COC medium</td>
</tr>
<tr>
<td>7.9</td>
<td>Effect of inoculum size on SSF of citric acid <em>A. niger</em> RCNM 17 in COC medium</td>
</tr>
<tr>
<td>7.10</td>
<td>Time course SSF of citric acid by <em>A. niger</em> RCNM 17 in COC medium under optimal conditions</td>
</tr>
<tr>
<td>8.1</td>
<td>SSF of citric acid <em>A. niger</em> RCNM 17 in pineapple waste (PAW) medium</td>
</tr>
<tr>
<td>8.2</td>
<td>Effect of pH on SSF of citric acid <em>A. niger</em> RCNM 17 in PAW medium</td>
</tr>
<tr>
<td>8.3</td>
<td>Effect of initial substrate moisture content on SSF of citric acid <em>A. niger</em> RCNM 17 in PAW medium</td>
</tr>
<tr>
<td>8.4</td>
<td>Effect of trace elements on SSF of citric acid <em>A. niger</em> RCNM 17 in PAW medium</td>
</tr>
<tr>
<td>8.5</td>
<td>Effect of different concentrations of ammonium nitrate on SSF of citric acid <em>A. niger</em> RCNM 17 in PAW medium</td>
</tr>
<tr>
<td>8.6</td>
<td>Effect of different concentrations of sucrose on SSF of citric acid <em>A. niger</em> RCNM 17 in PAW medium</td>
</tr>
<tr>
<td>8.7</td>
<td>Effect of methanol (3%v/w) on SSF of citric acid <em>A. niger</em> RCNM 17 in PAW medium</td>
</tr>
<tr>
<td>8.8</td>
<td>Effect of autoclaving time on SSF of citric acid <em>A. niger</em> RCNM 17 in PAW medium</td>
</tr>
<tr>
<td>8.9</td>
<td>Effect of inoculum size on SSF of citric acid <em>A. niger</em> RCNM 17 in PAW medium</td>
</tr>
<tr>
<td>8.10</td>
<td>Time course SSF of citric acid by <em>A. niger</em> RCNM 17 in PAW medium under optimal conditions</td>
</tr>
<tr>
<td>-------</td>
<td>-----------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>9.1</td>
<td>SSF of citric acid by <em>A. niger</em> RCNM 17 in sugarcane bagasse impregnated with cane molasses in absence and presence of methanol</td>
</tr>
<tr>
<td>9.2</td>
<td>SSF of citric acid by <em>A. niger</em> RCNM 17 in sugarcane bagasse impregnated with potassium ferrocyanide treated and EDTA treated cane molasses in presence of methanol</td>
</tr>
<tr>
<td>9.3</td>
<td>Time course SSF of citric acid by <em>A. niger</em> RCNM 17 in sugarcane bagasse impregnated with potassium ferrocyanide treated cane molasses in presence of methanol</td>
