# CONTENTS

## Chapter 1

**Introduction**

1.1 Urban Environment 1  
1.2 Biological Assessment of Urban Pollution 2  
1.3 Trends in Research 3  
1.3.1 Heavy Metals in Soil 3  
1.3.2 Heavy Metals in Plants 4  
1.3.3 Impact of some Gaseous Pollutants 5  
1.4 Basis for the Present Investigation and Objectives 7  
1.5 Scheme of the Thesis 8

## Chapter 2

**The Habitat**

2.1 Location 9  
2.2 Soil 9  
2.3 Climate 9  
2.4 Vegetation 12  
2.5 Vehicular Data 12  
2.6 Ambient Air Quality 12

## Chapter 3

**Materials and Methods**

3.1 Description of Experimental Sites 13  
3.2 Plants selected for the Study 13  
3.3 Sampling 15  
3.4 Analytical Methods 16  
3.4.1 Soil Parameters 16  
3.4.1a Sediment analysis 16  
3.4.1b Heavy Metals 16  
3.4.2 Plant Parameters 17  
3.4.2a Heavy Metals 17  
3.4.2b Epidermal studies 17
Chapter 4

Results

4.1 Heavy Metals in Surface Soil 26
4.2 Heavy Metal Index 28
4.2.1 Pictograph and predicate of the load representative supply 28
4.3 Sediment Analysis 31
4.4 Heavy Metals in Plants 40
4.4.1 Lead 45
4.4.2 Zinc 47
4.4.3 Cadmium 50
4.4.4 Nickel 52
4.4.5 Copper 54
4.4.6 Chromium 56
4.4.7 Manganese 58
4.5 Heavy Metals in unwashed leaf samples 70
4.6 Epidermal features 71
4.6.1 Stomatal frequency 71
Chapter 5

Discussion

5.1 Heavy Metals in surface soil 124
5.1.1 Lead 124
5.1.2 Zinc, Cadmium and Nickel 126
5.1.3 Copper, Chromium and Manganese 127
5.1.4 Heavy Metal Index 128
5.2 Heavy Metals in soil profile 126
5.3 Mobility of Metals in relation to organic carbon and pH 130
5.4 Heavy Metals in Plants 131
