ACKNOWLEDGEMENTS

It is a great pleasure for me to write this acknowledgement as it gives me an opportunity to thank many people who helped me to complete this research work.

At the outset, I am most grateful and indebted to my Ph.D. Supervisor, Dr K N Ninan, Associate Professor, Ecology Economics Unit, Institute for Social and Economic Change, Bangalore-72, who through his efficient guidance, thoughtful comments and constructive suggestions helped me in the completion of this thesis. But for the efforts of my Supervisor it would not have been possible to bring the thesis to the present shape.

I am also indebted to Dr R S Deshpande, Reader in Economics, Gokhale Institute of Politics and Economics, Pune, who had helped me in the initial stages of the preparation of this thesis. I have benefitted greatly from the discussions I had with him during the course of this research work.

I am most grateful to the Director, Institute for Social and Economic Change, Bangalore-72, for providing me an opportunity to pursue my Ph.D. study at
the Institute. I am also thankful to the UGC for awarding me a 'Teacher Fellowship' for pursuing this study.

I also express my sincere thanks to the Chairman (Professor S N Nanje Gowda), Department of Economics, Bangalore University and other faculty members especially Drs R G Desai, and D T Nanje Gowda who helped me in getting registration at Bangalore University and for their constant support and encouragement.

During the course of this study I benefitted greatly from the discussions I had with many distinguished professors. In particular, I am grateful to Professors V M Rao, M V Nadkarni and Abdul Aziz of the Institute, Professor S Giriappa of Mangalore University, Professors B R Hegade, K Ranganatha Sastry, Dr M G Chandrakanth, Mr K Pandurangaiah and Mr H Chandrashekar of the University of Agricultural Sciences, Bangalore.

I wish to express my sincere thanks to Professor Mali Madanna, Principal of Government Arts College, Bangalore (presently the Joint Director of Directorate of Collegiate Education), my friends at the Government Arts College and Project Formulation Division, Department of Planning, Bangalore, for their timely help and encouragement. I also wish to thank the Directorate
of Collegiate Education for having deputed me to the Institute for pursuing my Ph D work.

I am also thankful to the Director, Officers and other staff members of the Dry Land Development Board for their unstinted co-operation and help in collection of the relevant information for my Ph D study. I am also highly thankful to all the respondent households of Mittemari Watershed Project Area and Non-Project Area villages for sparing their valuable time and giving me the required information and data.

At the Institute, I am thankful to all the Library and Administrative staff who readily responded to my various requests connected with this Ph D work. My affectionate thanks to all my friends at ISEC whose help and encouragement sustained my spirit and enabled me to complete this thesis.

I owe a special word of thanks to Mr Krishna Chandran for helping me in the computer analysis of the data, Mr K S Narayana for word-processing the thesis and Professor B G Kulkarni for preparing the map.

Last but not least I am highly indebted to all my family members who gave all encouragement and support for the completion of my Ph D work.
I would like to recall here the wish of my father late Sri D S Hanumappa who showed a lot of interest in my Ph D work who is now no more to see the thesis. My heartfelt gratitude to him for his constant support and blessings.

S LAKSHMIKANTHAMMA
