ACKNOWLEDGEMENT

It is my privilege to express my profound sense of gratitude and indebtedness to Dr. RIAZ MAHMOOD, Reader, Department of Biotechnology, Kuvempu University, Shimoga and Chairman of my Committee for his valuable guidance and constant encouragement during the course of study. It was indeed a pleasure working under his guidance.

I am equally grateful and wish to express my whole hearted thanks to Dr. T.K.S. GOWDA, Professor, Department of Biotechnology, UAS, Bangalore and Co-guide of my Committee for his guidance, inspiration, criticisms and advice rendered in successful completion of my thesis.

With deepest sense of gratitude and reverence I pay my salutations to my teacher Late Mr. SUDARSHANA.L, Associate Professor, Department of Biochemistry, UAS, GKV, Bangalore

I have immense pleasure in expressing my profound thanks to Dr. Geeta Ramachandra, Retd. Professor, Department of Biochemistry for her encouragement, advice and suggestions. Dr. Anilkumar, Retd. Professor, Department of Plant Pathology, is gratefully acknowledged for providing me a senior research fellowship in NATP RNPS-4 project to carry out my research work and Dr. V. R. Sashidhar, Professor, Department of Crop Physiology for providing me the fellowship which was necessary for the completion of the thesis.

I would like to thank all staff and non teaching staff of Department of Biotechnology, Kuvempu University, Shankaraghatta, Shimoga, who supported me to reach this stage.

I shall be ever grateful to my husband Dr. Purushothama, for his everlasting love, care, support and encouragement to continue my higher education. My sincere thanks to my mother-in-law, father-in-law and my sisters-in-law, who always support, need timely help and care me. I like to thank my brother Moolemane for not only sparing his computer wholeheartedly to bring a shape to the manuscript and also for his support.
My sincere thanks to my father, for his love, affection, who inspired me to finish my study, also my brothers, my sisters, my sister-in-law, brothers-in-law, my aunts, uncles and grand parents for their constant encouragement, support and love.

It is my duty to express my feelings towards my sweet daughter Kum. Chaitanya, who stayed with me, who is an inspiration, who studied on her own during my late comings. I also like to thank the kids Deepu, Usha, Vani, Tejasvi, Dhruva, and little Ananya.

No words would replace to thank my close friends Rama, Usha and Sujith for their love affection, care and ever helping mind. I should thank Ramu sir, Tist, Anithakumari, for their help and support.

I should be grateful to my senior friends Dr. Anita Peter and Dr. Nirmala for their advice, support and critical evaluation of my thesis.

The Kirk house trust is acknowledged for providing me the chemicals and material to carry out the AFLP work. I should acknowledge Venkatesh, who taught me to carry out AFLP work.

The financial assistance provided by NATP RNPS-4 by way of Senior Research Fellowship. It was part of the NATP funded project; hence I express my sincere gratitude towards NATP for having provided the materialistic and financial support.

Finally I wish to express my deep sense of gratitude and acknowledge the help rendered in this work knowingly or unknowingly by many others

Shankaraghatta, August 2006

SHANTHALA, L.
