ACKNOWLEDGEMENT

I recall with deep-felt gratitude the inspiration, invaluable guidance and constant encouragement received from the late Prof. (Dr.) P.N.K. Nambisan, former Director, School of Marine Sciences, Cochin University of Science and Technology, during the earlier part of this study.

I would like to record my deep sense of gratitude to Dr. Jacob Chacko, Reader, Chemical Oceanography Division, Cochin University of Science and Technology, for guiding the research work, during the latter days and enabling me to complete this thesis as per schedule.

I am thankful also, to Dr. A.N. Balchand, Reader, Physical Oceanography and Meteorology Division, School of Marine Sciences, for his valuable suggestions and useful discussions.

I take this opportunity to thank Dr. N. Chandramohanakumar, Lecturer in Chemical Oceanography Division for his co-operation and help during the progress of the work.

I place on record, my gratitude to the Cochin University of Science and Technology for providing the necessary facilities. I also acknowledge the keen interest shown by Dr. N. R. Menon, Director, School of Marine Sciences, in these studies. I gratefully acknowledge Dr. A. Mohandas, Head, School of Environmental Studies, Cochin University of Science and Technology, for providing the computer facilities.
I am greatly indebted to Dr. C.R. Sivadasan, Senior Scientist (Q.C), Spices Board, Cochin and my colleagues there for their constant encouragement.

I appreciate the encouragement given by my colleagues in the School of Marine Sciences, especially in the Chemical Oceanography Division and thankfully acknowledge their whole-hearted co-operation at every stage of this work.

Finally, I express my gratitude to the University Grants Commission, New Delhi, for the financial assistance and to the Alexander von Humbolt Foundation, Bonn, Germany, for gifting the Atomic Absorption Spectrophotometer.
