ACKNOWLEDGEMENT

For having been initiated into a currently active and socially relevant field of research and for the invaluable guidance received in the conduct of this study, the researcher owes a deep sense of gratitude to Dr S. Govindarajalu, Reader & Head of the Department of Commerce, Islamiah College, Vaniyambadi. The completion of this research is owed very much to his deep interest and involvement throughout the course of the research period.

The comments, criticisms and suggestions offered by Dr M. Ranganatham, Professor & Head, Department of Commerce, University of Madras and Dr Mohammed Galib Hussain, Reader and Head, Department of Corporate Secretaryship, Islamiah College, Vaniyambadi at every stage of the study are gratefully acknowledged.

For the moral support and encouragement to pursue the research from Dr I.B. Syed Shahabuddeen, Principal, Islamiah College, Vaniyambadi and from Rev. Dr S. Thanislaus, SDB., Principal, Sacred Heart College, Tirupattur, the researcher feels highly indebted.
Dr Ravi, Department of Mathematics, Sacred Heart College, Tirupattur deserves all praise for his untiring help to the researcher in the statistical analysis of the data.

No amount of words would suffice to thank the staff in the Department of Agriculture, Block Development Officers and the village level extension officers who had been helpful by sharing the information they had with the researcher all along the field work.

Thanks in kudos to Mr Farhan Khaiyoom for all the help in typing the manuscript and in computing the final draft of the thesis.

Mrs Sridevi, the researcher’s betterhalf, had ungrudgingly shouldered the total family role for over three years, sparing her husband to do his best in his research venture. Special thanks to her.

Mr Muniappa Naidu and Mrs Pattammal, poor peasants and parents of the researcher are best complimented for their blessings and support.

Last, but not the least, the Subjects of this study, the case-respondents, cannot be forgotten for their hospitality and whole hearted cooperation during the field work, but for which this study could not have been accomplished.
