ACKNOWLEDGEMENTS

I wish to express my deep sense of gratitude to Dr. Katre Shakuntala, Professor of Zoology, Bangalore University, for her inspiring guidance, critical comments and sustained patience. Her unflagging encouragement gave the much needed boost in this effort. She has constantly pointed me in the right direction and egged me on whenever I faltered.

Dr. V. S. Ranganathan, Professor & Head of the Department of Zoology, has given me help and encouragement during my stay in the Department. My sincere thanks are due to him.

I got interested in birds and birdwatching nearly two decades ago. All these years, many individuals have generously given me advice, granted me countless facilities, and given published material. My thesis is the fruit of all their support. I would like to make a mention of them here. For those whose names I have missed, it was not really intended. I request them to excuse the omission and take my gratitude as said.

Many of my birdwatcher friends have provided the right atmosphere for constructive birdwatching over many years. My special thanks are due to them. Dr. S. Subramanya and Dr. B. K. Chakrapani have guided me out of bleak looking situations to make this field my career. If I have learnt about using computers, which has helped me in my research, it is because of Mr. N. Srinivasan, Mr. S.
Sridhar, Mr. T. S. Srinivasa, Mr. O. C. Naveen and Mr. Leo F. Saldanha. The original source of inspiration and the guiding spirit in my birdwatching career has been Dr. Joseph George. Dr. M. D. Parthasarathy's advice and encouragement influenced me in taking up Zoology. Without their unstinting advice and unwavering encouragement, things would have been quite different. Mr. U. Harish Kumar helped me in the collection of field data from the two minor study sites, along with Mr. S. Karthikeyan and Mr. J. N. Prasad. To all of them I owe my special thanks.

When field work is attempted, the selection of sites becomes a priority. Mr. H. R. Krishnamurthy and Mr. K. Ullas Karanth have provided useful information. Mr. A. N. Yellappa Reddy, Mr. M. L. Ramprakash, Mr. N. S. Adkoli and Mr. A. Krishnaswamy have been very responsive. I thank them all with great pleasure.

Mr. K. Srinivas, Dr. H. J. Vaman, Mr. R. Anantha Rao and Dr. Gurumurthy have enlightened me on various aspects of statistics over the years. Dr. K. Harishchandra, of the Statistics Department, and Dr. Ashok D. Belegundu, of the State College, University of Pennsylvania, have helped me with programing and computation, as has Mr. Seshadri. To all of them I owe special thanks.

There have been a few, very essential equipment necessary for birdwatching. During my prolonged involvement in this field, generous help has been given in this regard by Late Mr. D. V. Krishna Rao, Mr. D. K. Ramchandra, Mr. M. N. Gopalaswamy and Dr. B. N. Sridhar.

Literature is of vital importance to keep abreast of
developments. Many people have helped by making relevant literature available. Among them, Mr. Johnson E. David, Administrator, WWF-Data Centre; Dr. K. Chandrashekar, Dr. Raghavendra Gadagkar, Mr. Venkat Rao and Mr. H. S. Suresh of the IISc. deserve special mention.

I thank the UGC and CSIR, for the NET Fellowships which made the Western Ghats work possible, the UAS and the CES for giving access to their libraries, the Bangalore University for a placement for the degree, and the officers and staff of the Bangalore University, who helped my thesis become a reality. I also thank Mr. N. Srinivasan, and Mr. S. Sridhar at Navbharath Enterprises for making laser printing the thesis possible.

Research students and teaching staff of the Geology and Botany Departments have given much useful information. I appreciate the same. I also thank all my colleagues in the Fishery Biology Lab of the Bangalore University for their comraderie and support.

I would also like to remember all those local people who were helpful in the field.

Last but not the least, I would like to thank all my family members, for the support and encouragement they have given me right through.

M.B. KRISHNA
