ACKNOWLEDGEMENTS

Completing my PhD degree is probably the most challenging activity of my life. The moments of my doctoral journey have been shared with many people. It has been a great privilege to spend several years in the Department of Microbiology and Biotechnology Centre at M. S. University of Baroda and its members will always remain dear to me.

I express my deep sense of gratitude to my supervisor Dr. G. Archana, for introducing me to the field of rhizobacterial plant interactions. Her valuable guidance, encouragement, scientific temperament has always encouraged me towards a quality work. Her in-depth scientific discussions have always helped me to hone my work. One of her quality that I wish to imbibe is concise yet effective presentation of research work.

I would like to thank Prof. T. Bagchi, head for providing the infrastructure for the execution of work.

I like to thank former Heads Prof. Anjana J Desai and Prof H. S. Chhatpar, for their constructive criticism and immense support. I would like to take this opportunity to thank Dr. Anjana Desai for the immense confidence that she laid in me and independence she provided us for conducting the research work.

I also thank Prof. G. Naresh kumar, Head, Department of Biochemistry, for his critical suggestions and unending scientific discussions on PGPR. His in-depth knowledge has always inspired to dwell deeper into the subject of our research.

I thank all the teaching members of the department, Dr. Anuradha Nerurkar, Dr. Sanjay Ingle, Dr. Pranav Vyas and Dr. Nandita Baxi for their timely support and extending help as and when required.

Falguni Joshi and Ruchi Chaturvedi are acknowledged for being patient with me. During my tenure as a research student Falguni has really helped me to establish in the lab. They have helped me solve hurdles in research for making me competent enough to build up my scientific aptitude.

I have shared great spiritual rapport with Aparna madam. She has been an incredible support in the department. Her concerns and elderly love has allowed me to settle comfortably in the lab. Priya Pillai is acknowledged for her immense support and fond concern for my work. Her suggestions during my protein work were greatly valued. Your meticulous planning of work is commendable.

A journey is never complete without fellow itinerants who help develop your path. During my initial tenure as a PhD. student several of my friends across the two sister departments have helped me a lot. I thank Vipul Gohel, Manish Shukla, Avishek Nath, Kuldeep J Patil, Getha Rajendran, Sanket Joshi, Rajeev Vaidya, Bragdish Iyer, Harsukh Tank, Shubhankar Roy, Rajesh.
Patkar, Sanjay Jha and Shajil Madhavan. I would like to especially thank Vikas Sharma and Divya Patel for their valuable help during my initial work on phosphates solubilisation.

Some people have treaded the path along with me and have made this journey memorable and joyous. I would like to thank all my colleagues during the tenure AK Singh, Aparna Akolkar, Harish Suthar and Marpe Bam I share a special camaraderie with my fellow labmates Vimal Maisuria and Priyadarshan Keluskar and it has been a really memorable time that I have spent with you both. My special thanks to Subbu, Srinandan and Ketan Patel for the special time that we have spent together at hostel as well as department. I have loved and shall rejoice our several discussions, scientific, religious and endless topics. Radhika Yadav, Sumant Chaubey, Chandal Kumar, Jaga Rathod are duly acknowledged.

Time never stops. The flow of time introduced me to new friends like Anoop Markande, Krushi Hingurao, Sanjukta Samuralaptam and Akhilesh Dhanani who have made a part of my PhD journey memorable. My special thanks to the “wearer of many hats” Anoop Markande, who has seamlessly blended with us and for several memorable trips that we had together. His timely help with my thesis was the greatest help.

I also acknowledge several of the members, Trafina Jadhav, Swapna Bhatt, Kavita Shama, Mandar Dixit, Pehnita Bhan, Koustubh Vaze, Alka Bhat from the department who allowed me to enjoy the quasi- MSU M.Sc status at the department. The time spent with them makes one of most memorable time in the department. My special thanks to my dissertation students, Shalmali and Pratik.

My best wishes are with all the new members, Vihang, Manasi, Kinnary, Sneha, Shweta, Jitendra, Jigar, Janaki, Ruchi and Rakesh of the department for their successful, memorable and joyous stay at the department.

I thank office staff-Shrish Nagarkar, Nimai Mandwekar, Bharat Talati, Pravin Vankar and Allema Thomas for their assistance in all office work.

I thank Prof. Sharon R Long (Stanford University, USA) and Prof. Hai Ping Cheng (University of North Carolina, USA) for providing the required strains. I would also acknowledge the efforts of Central laboratory, GSFC, for soil analysis. Also I would like to thank the Faculty at Environment Engineering, Department Faculty of Technology and Department of Chemistry for AAS of the samples.

I thank the funding agencies GSBTM and UGC for their financial support during the period of my research.

My deepest gratitude goes to my family for their persistent love and support throughout my life. This dissertation is simply impossible without their patience and invaluable support. My special thanks to my older brother who has unconditionally supported me throughout my tenure in Baroda. My father and brother has been the pillar of strength in my life. No words can thank them enough. “Ohanyavadam."
Everyone has its destiny guided by the almighty. My sincerest gratitude to the supreme powers, Maya and Bhole, for providing me the eternal strength to imbibe the best from the most difficult situations. Being a person of few words I would like to apologize to people who may have been left in the process, however their smallest contribution towards this process is duly acknowledged.

Murali Sharaff
