List Of Figures

Chapter 1

1.1 Level 1 To 5 In CMM Framework 5
1.2 Phases Associated With General Model Of Software Life Cycle 9
1.3 Refined Software Engineering Life Cycle Model For The Object Oriented Paradigm 12
1.4 Relationship Of Reliability To The Different Life Cycle Phase 13

Chapter 2

2.1 Reliability Function In Relation To Failure Intensity 18
2.2 Decrease In Failure Intensity Increases Reliability 19
2.3 Process For Developing Operational Profile 21
2.4 Software Reliability Prediction 21
2.5 Classification Of Software Reliability Models 25
2.6 Software Reliability Growth 26
2.7 Running Average Analysis Of Time Between Failure Data 34
2.8 Running Average Analysis Of Failure Count Data 34
2.9 Laplace Test 35
2.10 Prequential Likelihood 36
2.11 Model Bias 37

Chapter 3

3.1 An Object Oriented Development Method 50

Chapter 4

4.1 Levels And Links In QMOOD 63

Chapter 5

5.1 RFQMOOD Model 85
5.2 Interdependency Among Quality Attributes 87
5.3 Theoretical Basis For The Development Of OO Product Metrics 89
5.4 X Is A Stable Package 93
5.5 Y Is Dependent 95
5.6 A Vs I Graph 95
5.7 Where To Put X On A I Graph 95
Chapter 6

6.1 User Interaction Hierarchy 107
6.2 Cohesion Spectrum 114
6.3 Coupling Spectrum 114
6.4 Instability Graph 115
6.5-9 A I Graph for All Case Studies 116-19
6.10 Nomenclature For Defining Y 125
6.11 Stepwise Regression for Defect Density Model ATM 126
6.12 Partial Regression Leverage Plot for X5 ATM 126
6.13 Stepwise Regression for Defect Density Model BSP 127
6.14 Partial Regression Leverage Plot for X5 for BSP 127
6.15 Stepwise Regression for Defect Density Model DRS 128
6.16 Partial Regression Leverage Plot for X5 for DRS 128
6.17 Stepwise Regression for Defect Density Model ODS 129
6.18 Partial Regression Leverage Plot for X5 for ODS 129

Chapter 7

7.1 Reliability Increase As Failure Intensity Decrease For Exponential Model Parameters 139
7.2 Reliability Increase As Failure Intensity Decrease For Exponential Model Parameters 140
7.3 Increase in Reliability with increasing CMM level 141
7.4 Increase in Reliability with Increasing Team Level 141
7.5 Relative Difference between High Average and Low Team Factor 142
7.6 Differences In Reliability Estimation Using Exponential And Logarithmic Model Parameters 143
