Acknowledgements

Language is the most eloquent way of expression, yet there are occasions, when it becomes difficult to get appropriate words to express a feeling fully, because our feelings transcend the literal meanings of words, as we mean much more than words can convey.

The first and foremost person whom I am profoundly indebted for providing me an opportunity to go ahead with my Ph.D. is my revered guide Prof. DD Bansal, Ph.D. (Belfast, N Ireland), Department of Biochemistry, Panjab University, Chandigarh. He provided perpetual inspiration, immaculate guidance and constructive feedback. His excellence and experience abroad had a great impact on the execution of this work. I feel proud of being your student Sir.

I feel lacking in words to express my profound sense of obeisance to my esteemed co-guide Dr. R. Sialy, Associate Prof. Department of Endocrinology, PGIMER Chandigarh. Despite being extremely busy, she was always available with an "inviting" smile to guide me through many pitfalls in the field of my research.

I owe my sincere thanks to Prof. P. Ahluwalia, Chairman, Department of Biochemistry, Panjab University Chandigarh for providing me the necessary facilities.

The permission for Ph.D. granted to me by Director Principal, Govt. Medical College Hospital, Chandigarh is gratefully acknowledged. I wish to record my sincere thanks, not as a mere sense of obedience, but as a real appreciation to Dr. Jasbinder Kaur, Head, Department of Biochemistry and Dr. Vinod Rattan, Govt. Medical College & Hospital, Chandigarh for providing me necessary facilities for undertaking this work. Their judicial and valuable guidance, keen interest and constructive criticism, during the course of investigations were commendable.

I wish to express my deep appreciation to Dr. Rajat Sandhir, Department of Biochemistry who provided guidance and valuable suggestions at every stage of work. It is impossible
to acknowledge a debt of gratitude, I owe to him for his deep involvement.

It is beyond my access to acknowledge with words the ever-willing voluntary assistance rendered by my close associate Kavita. She not only inspired me but her close care and affection along with strong shoulder, gave me a place full of solace and peace of mind, to lay my head on, during any depression.

Dharm Pal Chaudhary and Rishab Dev were equally painstaking in providing me crucial assistance in standardizing some experiments without whom, I would have, still, been furloughing in dark to conclude my work.

A long list of well wishers from Department of Biochemistry, Govt. Medical College Hospital, Chandigarh, to whom I am deep indebted, encouraged me with their full support and co-operation through without any reservations. I am thankful to one and all, from the core of my heart for bearing with me.

No words of thanks are enough for the help I got from the Department of Biochemistry, Panjab University, Chandigarh. I am deeply grateful for their co-operation in every aspect of my being.

I owe a lot to my better half Ranjana who always looked after me supported me with her utmost zeal, to fulfill my dream. Last but not least, I have to compensate through my nose, the moments, when I should have been with my souls Ananya and Seema for they gave me a kiss of life to rejuvenate me through this ordeal. My special words of thanks are reserved for my nieces Isha and Sighu.
