CONTENTS

Chapter I

1.1 Introduction to ABO and Rh blood groups ......................... 1
1.2 Introduction to Haptoglobin ............................................. 12
1.3 Introduction to GLO I .................................................... 45

Chapter II

2.1 Review of Literature on the interaction between ABO-Rh loci .. 51
2.2 Review of Literature on the interaction between ABO-Hp loci .. 71
2.3 Review of Literature on the interaction between Hp-GLO I loci 74
2.4 The Present problem of study ........................................... 75

Chapter III

Materials and Methods
3.1 People: Arora and Khatri ............................................... 77
3.2 Sample collection and data analysis techniques .................. 98
3.3 Haptoglobin typing ....................................................... 100
3.4 Glyoxalase I typing ....................................................... 106
3.5 Statistical consideration ................................................ 110

Chapter IV

Population variations vis-à-vis ABO, Rh, Hp and GLO I loci .......... 119

Chapter V

Interaction between ABO-incompatibility and Rh-incompatibility .. 135
ABO-incompatibility and Reproductive failure .......................... 144
Chapter VI
Interaction between ABO-incompatibility and Hp locus ........................................ 152

Chapter VII
Interaction between Hp and GLO I loci ................................................................. 157

Chapter VIII
Summary and Conclusion ....................................................................................... 163

References ............................................................................................................. 180
