ACKNOWLEDGEMENTS

To Dr. R. K. Dewan, Reader, Department of Chemistry, Panjab University, Chandigarh, who patiently supervised this work with a great critical insight and intellectual acumen. In fact, without his consistent critical suggestions, constant encouragement and sincere cooperation, it would have been impossible for me to complete this scientific work. He has a big hand in making this project a success.

To Professor S. V. Kessar, Chairman, Department of Chemistry, Panjab University, Chandigarh, for providing me with all the necessary laboratory facilities.

To the Ministry of Education, Zanzibar - Tanzania, and Government of India for selecting me and for the award of the scholarship under ITEC academic and exchange Programme.

To my parents who voluntarily attended to many of my problems at home and to all relatives who inspired me to go ahead with the study.

To my wife whose presence in my mental sphere has enabled me to be always on the track of studying and whose love I have always felt as a force energizing me to work more and more.
To Najma and Bishara, my daughters, for depriving them of my instinctive affection at their tender ages. It is highly heartening to think that soon I would be in their midst.

To my laboratory colleagues Mr. Baldev Singh, Mr Surinder Mehta, Miss Geeta Singla, Mrs Usha Sharma, Miss Harjeet Kaur, Mr Rajneesh Kumar, Mrs Vanita Dewan, Miss Savita Sharma, Mr. Md. Azhar Ali (from Bangladesh), Mr Vinod Kumar Sharma and others for their kind cooperation and also for keeping a lively atmosphere in the laboratory.

To the Incharge, Computer Centre, Panjab University, for providing the necessary computer facilities.

To Mr. M. K. Bedi, for careful typing of this thesis.

To my friends in Chandigarh whose wishes, friendships, encouragement and companionship have made it possible to overcome the frustration of living in a foreign land.

And also to all those who contributed to the success for this work.

(Y. N. Pandu)
