ACKNOWLEDGEMENTS

I express my sincere gratitude to Dr.R.Sambasiva Rao, M.D., F.A.M.S., F.A.B.M.S., Director-Professor of Microbiology and Medical Superintendent, Jawaharlal Institute of Postgraduate Medical Education and Research, for his constant encouragement and guidance during the course of this work.

I express my deep sense of gratitude to Dr.S.Badrinath, M.D., Head of the Department of Microbiology, JIPMER, for his untiring help and continued encouragement which made it possible to complete this work.

I thank Dr.D.S.Dubey, Director, JIPMER, for permitting me to carry out this work as part-time Ph.D. candidate.

I thank Dr.K.S.V.K.Subba Rao, Dean, JIPMER, for his kind co-operation in all academic matters concerning the submission of my thesis.

I thank Dr.S.Srinivasan, Professor and Head of the Department of Paediatrics; Dr.P.Nalini, Professor and their team, who have helped in selection and diagnosis of cases for this study.

I thank Dr.D.K.Srinivasa, Retd.Director-Professor of Department of Preventive & Social Medicine, JIPMER and Dr.J.Balachander, Professor of Cardiology for their help in carrying out the school surveys.
My sincere thanks to the following persons for their contributions in making this study possible:

Miss. Dorothy d’lima, Mrs.Vijaya, Mr.Senthil Kumar, Miss.Srilatha, Miss.Sheela, Miss.Hemalatha, Mr.Canniappan, Mr.Sakthivel and Miss Anitha Asha for their technical help.

Dr.P.Venkatesan, Scientific Officer, Tuberculosis Research Centre, Chennai; Dr.Anil, Senior Resident and Dr.Sahai, Professor of the Department of P.S.M., JIPMER and Mr.Dhanagopal of V.C.R.C., Pondicherry for statistical analysis and computer aid.

I wish to thank Dr.Paramasivam, Deputy Director, T.R.C., Chennai and Dr.S.P.Pani, Deputy Director, V.C.R.C., Pondicherry, for making it possible to get in touch with the right persons.

I wish to thank the management of various schools and Medical Officers of the Primary Health Centres and General Hospital, Pondicherry for extending full co-operation in selection of the subjects.

My special thanks are due to Mr.M.K.Natarajan, Scientific Officer-cum-Tutor and his team from the media room for having supplied unlimited quantity of media throughout the study period. I am grateful to Mr.Menon and Mr.Shashindran of the Medical Illustration Division for their technical help in photography.

I wish to thank Dr.Charlotte Larsson, Department of Infectious Diseases, University Hospital of Lund, Sweden for giving me the standard strains, certain chemicals and reagents for use in this work.
This study was supported partly by materials from the following projects for which I am thankful.

1. Prevention of Rheumatic fever and rheumatic heart disease under the WHO and ICMR collaborative project.

2. Indo-Swedish project on antibiotic resistance pattern of respiratory pathogens - a study in South India.

3. Indo-US.VAP project on ARI organisms for characteristics pertinent to vaccine development.

I thank my colleagues and the residents of the Department of Microbiology for whatever help that they have rendered, especially Dr.Premanand,N. and Dr.V.Gayatri of Department of Paediatrics, for their contributions towards this work.

I wish to thank Mr.S.Perumal for typing the manuscript through various stages and bringing it to the present form.

Finally, I wish to thank my family members who backed me at all stages and kept me going, inspite of all the difficulties.

Last, but not the least, I wish to thank my daughter Anu for all the help she extended in her own little way and for asking all those questions which set me thinking in the right direction.

REBA
