CONTENTS

1. Introduction 1

2. Review of Literature 10
   2.1 Ethanol absorption and metabolism 10
   2.2 Ethanol and acetaldehyde effects 15
   2.3 Effects of ethanol on liver 17
      2.3.1 Role of alcohol dehydrogenase 18
      2.3.2 Role of aldehyde dehydrogenase 20
      2.3.3 Ethanol and drug metabolizing enzymes 21
         2.3.3.1 Ethanol and cytochrome P<sub>450</sub> 22
         2.3.3.2 Ethanol and cytochrome b<sub>5</sub> 23
         2.3.3.3 Ethanol and cytochrome C reductases 24
         2.3.3.4 Ethanol and glutathione-s-transferase 25
      2.3.4 Ethanol and lipid peroxidation 26
      2.3.5 Ethanol and reduced glutathione 30
      2.3.6 Ethanol and antioxidative enzymes 32
         2.3.6.1 Ethanol and catalase 33
         2.3.6.2 Ethanol and superoxide dismutase 33
         2.3.6.3 Ethanol and glutathione peroxidase 35
         2.3.6.4 Ethanol and glutathione reductase 36
   2.4 Ethanol effects on intestine 36
      2.4.1 Ethanol and drug metabolism 39
      2.4.2 Ethanol and antioxidants 40
   2.5 Zinc 42
      2.5.1 Metabolic role of zinc 45
      2.5.2 Zinc deficiency and diseased states 47
   2.6 Zinc-ethanol interactions 50
      2.6.1 Trace metals, zinc and ethanol 53
   2.7 "Zn uptake and retention studies 55
3. **Materials and Methods**

3.1 Chemicals 59

3.2 Animals 59

3.3 Experimental design 59

3.4 Body weight changes 60

3.5 Collection of blood samples 61

3.6 Determination of acetaldehyde levels 61

3.7 Preparation of tissue homogenate 62

3.8 Chemical analysis and enzyme assays 63

  3.8.1 Determination of protein content 63

  3.8.2 Estimation of activities of alcohol metabolizing enzymes 64

    3.8.2.1 Estimation of alcohol dehydrogenase activity 64

    3.8.2.2 Estimation of aldehyde dehydrogenase activity 65

  3.8.3 Assay of drug metabolizing enzymes 67

    3.8.3.1 Assay of cytochrome P<sub>450</sub> 67

    3.8.3.2 Assay of NADPH-cytochrome C reductase 67

    3.8.3.3 Assay of cytochrome b<sub>5</sub> 68

    3.8.3.4 Assay of NADH-cytochrome C reductase 69

    3.8.3.5 Assay of glutathione-s-transferase 70

3.8.4 Determination of NADPH-dependent lipid peroxidation 71

3.8.5 Determination of reduced glutathione 72

3.8.6 Estimation of antioxidative enzymes 74

    3.8.6.1 Estimation of catalase 74

    3.8.6.2 Estimation of superoxide dismutase 75

    3.8.6.3 Estimation of glutathione peroxidase 76

    3.8.6.4 Estimation of glutathione reductase 77

3.9 Radioisotopic studies 79
3.9.1 Whole body biological half life of $^{65}\text{Zn}$ 79
3.9.2 Biological half life of $^{65}\text{Zn}$ in liver 80
3.9.3 Uptake studies 81
3.9.4 Uptake of $^{65}\text{Zn}$ in liver slices 81
3.9.5 Uptake of $^{65}\text{Zn}$ in intestine 82
3.9.6 Sub-cellular radioisotopic activity 83

3.10 Trace element analysis 84

4. Results 85

4.1 Body weight changes 85
4.2 Acetaldehyde levels 86
4.3 Alcohol metabolizing enzymes 86
  4.3.1 Alcohol dehydrogenase 86
  4.3.2 Aldehyde dehydrogenase 90
4.4 Drug metabolizing enzymes 94
  4.4.1 Cytochrome P<sub>450</sub> 94
  4.4.2 NADPH-cytochrome C reductase 97
  4.4.3 Cytochrome b<sub>5</sub> 100
  4.4.4 NADH-cytochrome C reductase 103
  4.4.5 Glutathione-s-transferase 106
4.5 NADPH-dependent lipid peroxidation 109
4.6 Reduced glutathione 112
4.7 Antioxidative enzymes 115
  4.7.1 Catalase 115
  4.7.2 Superoxide dismutase 119
  4.7.3 Glutathione peroxidase 122
  4.7.4 Glutathione reductase 125
4.8 Radioisotopic studies 128
  4.8.1 Whole body biological half life 128
  4.8.2 Biological half life in liver 130
  4.8.3 Uptake studies 130
4.8.4 Sub-cellular distribution of the tracer

4.9 Trace elemental studies

5. Discussion

5.1 Body weights

5.2 Alcohol metabolizing enzymes

5.2.1 Alcohol dehydrogenase

5.2.2 Aldehyde dehydrogenase

5.3 Acetaldehyde

5.4 Phase I drug metabolizing enzyme system

5.4.1 Cytochrome P<sub>450</sub>

5.4.2 NADPH-cytochrome C reductase

5.4.3 Cytochrome b<sub>5</sub>

5.4.4 NADH-cytochrome C reductase

5.5 Phase II drug metabolizing enzyme system

5.6 Lipid peroxidation

5.7 Glutathione

5.8 Enzymes of antioxidant defense system

5.8.1 Catalase

5.8.2 Superoxide dismutase

5.8.3 Glutathione peroxidase

5.8.4 Glutathione reductase

5.9 Radioisotopic studies

5.9.1 Biological half life in whole body

5.9.2 Biological half life in liver

5.9.3 Uptake studies

5.9.4 Sub-cellular distribution of 65Zn

5.10 Elemental analysis

6. Summary

7. Bibliography
