ACKNOWLEDGEMENTS

It gives me immense pleasure to express my heartfelt gratitude to my guide Prof. H. M. Dani (Ph.D Punjab and London) Department of Biochemistry, Panjab University, Chandigarh for his able guidance, invaluable suggestions and ever inspiring attitude throughout the tenure of this work. After my graduation in Biochemistry from Amritsar, I left for Chandigarh, just because I had a desire to get associated with Dr. H. M. Dani. Having worked with him during my Master’s as well as Doctoral courses, this thesis comes out as my dream come true.

I owe millions of thanks to Prof. K. L. Khanduja, Head, Department of Biophysics, PGIMER, Chandigarh, a man of principles, who inspite of various administrative hurdles, helped me nurse this project from a mere idea, stage to the one in hands. Had it not been for him, it was an impossible task. No gilded words can fathom the acumen, affection and guidance that I received from Prof. Khanduja. His foresightedness, professional excellence, analytical power, timely deserved constructive criticisms and thought provoking discussions worked as ‘essential growth factors’ for the execution of this work. I will always cherish my association with him, from which I could learn the values of science as well as life.

I am indebted to Prof. P. Ahluwalia, Chairperson, Department of Biochemistry, Panjab University, Chandigarh, Prof. Rajeshwar Sharma, Prof. D.D. Bansal, Dr. S. Ojha and whole Faculty of Biochemistry for their timely help and encouragement.

My thanks are due to Dr. C.M. Pathak, Addl. Prof., Department of Biophysics, PGIMER, Chandigarh for his constructive suggestions and continuous interest in the progress of my work. Affection and encouragement shown by Dr.S.S. Arora and Mr. Rajeshwar Sharma is gratefully acknowledged.

A special vote of thanks is deserved by the technical and administrative staff of Department of Biophysics, PGIMER, Chandigarh for always being so nice and helpful. Unconditional support by Sh. V. K. Sarin and Sh. Lal Singh
will be remembered forever. Help rendered by Mr. Dan Singh is duly acknowledged.

I would like to thank Mr. B. B. Kar and Mr. Bharat Mani for their ever helping attitude and cooperative behaviour.

I would like to mention that cooperative attitude of all my past and present colleagues had a direct impact on the successful completion of this thesis.

Friends are like flowers in the garden of life, which emit the fragrance of moral support. Dr. Parminder, Dr. Manjinder, Dr. Sonali, Ms. Achu, Ms. Neevita, Ms. Rajinder and Ms. Manju mattered a lot just by being there whenever needed.

Thanks are due to my dear friend, Dr. Nidhi Mittal and her family for their support and for making my stay in Chandigarh so comfortable.

The blessings of my grandparents, love and care shown by my both brothers and bhabies have made this dream venture-a reality. Little talks of my nephews Robin, Shan and Pahul during my home visits always rejuvenated me for the next task. I will always be indebted to Goldy Veer for his unforgettable moral support during tough time.

Someone, from across the oceans, always bolstered me with encouraging words during tough situations. No thanks! As thanking him is just like thanking myself.

I must appreciate the skills of Mr. Surinder and Mr. Mukesh of Kaizen Graphics, Chandigarh for giving this manuscript a presentable shape.

The credit for the successful completion of this project goes to those tiny speechless subjects, who innocently sacrificed their lives, without which this study would not have been possible.

Above all, I offer my humble obeisance to the Almighty, Who provided me endurance and eventually rewarded me with the successful completion of this difficult task.
