Acknowledgement

First and foremost, I would like to express my deep regards and sincere thanks to my supervisor Dr. Jagmohan Singh whose expert guidance, zealous interest, valuable support and above all his ability to make the most difficult tasks simple has made it possible for me to complete this study. He has nurtured in me the feelings for basic research and introduced me to the scientific way of life that demands constant improvement, dedication, devotion, determination, meticulous planning and patience. Though it will take time for me to imbibe all these qualities yet they will surely help me stand strong in my future endeavours.

I am grateful to Dr. Amit Ghosh, Director, IMTECH, for providing excellent research facilities and for his encouraging and friendly attitude. I gratefully acknowledge Dr. C.M. Gupta, Ex-Director, IMTECH, for providing me the opportunity to work in IMTECH.

It is a privilege to thank Drs. K. Ganesan, G. Sahni, G.P.S. Raghava, S.C. Mande, P. Guptasarma, A.K. Bachhawat and K. Shastri for their helpful suggestions and invaluable discussions during the course of this work.

Thanks are due to my labmates Rajkumarji, Vintoo, Rudra, Sharan, Vishal and Lakshmipathi for their help and suggestions. Special thanks to Shakil who has not only been a cooperative senior but also a wonderful friend.

The beauty of moments shared with Raman, Ish, Rohini, Vandana, Smriti, Abhijeet, Subba, Sudeep, Bharat, Gautam, Navneet and Surinder will always be cherished.

I am fortunate to have nice and generous seniors, juniors and colleagues specially Owaisji, Deepak, Jitesh, Rajesh, Indrani, Vibha, Pooja, Manish, Ashish, Charu, Makkar, Deepa, Randhir, Pratima, Rekha and others whose cooperation and encouragement made me feel homely during the stay at IMTECH.

The cooperation and kind help of the staff of Animal House, BIC, Library and Administration is fully acknowledged. The fellowship provided by CSIR during Ph.D. is also acknowledged. I sincerely thank Mr. Sushil Kumar for all the efforts he put in the accurate and fast typing of the thesis.

I express my gratitude for my M.Sc. supervisor Dr. Gaya Prasad who has been instrumental in paving my way into the field of science.

It’s the love and faith of my family that helped me overcome all odds and enabled me to finish this study with their constant encouragement. My younger sisters Anjali and Parul have provided me the much needed liveliness and they are especially thought of with love at this moment. I have been lucky to find my soul mate Gaurav who provided me with moral support to be able to finish this study.
