Acquiring a Ph.D. degree from Kuvempu University through the prestigious UBDT College of Engineering, Davangere, is a ‘dream come true’ for me. It is my privilege to acknowledge the contribution of people who have facilitated my achieving this goal.

First and foremost, I express my heartfelt gratitude to my research supervisor Dr. N. Nagesha, Professor, Department of Industrial and Production Engineering, UBDT College of Engineering, Davangere. He is my ‘guide’ in the truest sense of the word in all my research activities. He has shown me a lot of affection, provided great motivation and support and stood behind me during my entire research tenure. My research is immensely benefited by his disciplined academic practices. I am indeed proud to be his research student. I am thankful to him for his meticulous supervision, continuous guidance. His comments on the draft were significantly crucial for successful completion of my thesis. I whole heartedly thank him for guiding me throughout my research work.

I cannot forget to thank all the entrepreneurs and the employees of sampled brick manufacturing industries in the study clusters of Malur, Tiruvalur, and Krishna, for having spared their valuable time with me during field visits and furnished me with crucial data pertaining to their firms, without which my research would not have been possible. I thank the members of brick association of Malur cluster and District Industries Centre of Kolar district for their vital information and support on the Malur brick industries. Similarly, I thank the brick association members of Tiruvalur cluster, for their valuable information on the brick units in Tiruvalur cluster. I cannot forget to thank Nelson Nadar of Tiruverkadu in Tiruvalur cluster and SKV Reddy youth hostel warden of Vijayawada and others who helped me for my stay in the respective clusters. Without their guidance and advice many of the interviews with entrepreneurs could not have been possible.

I desire to place on record my appreciation to the authorities at Kuvempu University. I wish to place on record, my gratitude to all the teaching and non-teaching staff of Industrial & Production Engineering, UBDTCE, Davangere and also the Principal and college staff for
their support during my research work. I thank my fellow researchers Dr. Rajakumar D.G, Mr. T.D. Manjunatha and Dr. S. Somashekar for their timely assistance and support throughout my research work. I am thankful to my parent institution Dr. T.Thimmaiah Institute of Technology (Dr.TTIT), for providing me an opportunity to pursue my doctoral studies at UBDT College of Engineering, Davangere. It is a matter of great pleasure to thank Prof. U.N. Kempaiah, former principal of Dr.TTIT, who was instrumental in permitting me for Ph.D. research work. I wish to thank all my colleagues at Dr.TTIT, Specifically Prof. D. Srinivas Roa, for the moral support and affection I got from them.

I am ever grateful to my worshipful parents Sri. Late Chinnanna and Smt. Rajamma, who despite living in a small town of Kolar Gold Fields, always had a broad vision and blessed me for achieving excellence in all my academic pursuits.

I am also deeply indebted to Dr. M.H. Bala Subhramanya and Dr. P. Balachandra, Professors, Department of Management Studies, IISc, Bangalore, and also Dr. N.V. Raghavendra, Professor, National Institute of Engineering, Mysore, with whom I have had fruitful discussions. Their valuable suggestions in fine tuning the objectives, preparing the questionnaires for data collection, and their support have greatly helped me to accomplish the present study.

Finally I express my deep sense of gratitude to all those who helped me directly and indirectly in carrying out this research work.

Narasimha. C
