Acknowledgements

This journey started from the first day on working bench to this day, where I am writing a note of thanks to all those who have been part of this wonderful experience. During this period, I have experienced that “no gain without pain”. These five years have taught me countless lessons about understanding a person and reading their thoughts apart from scientific knowledge. Most importantly that listening to others is also important in every conversation. Experiences during PhD are numerous, where you actually feel determination, guidance and support of other persons. They are members of your second home (lab). When I find myself at the end of this journey, I realize that, in fact it was support of various people, kind help and team work which directed me here. Although it is difficult to express in words, I want to thank all those who have been generous to me and helped me by any means during these years.

First of all I wish to deliver my sincere thanks to my PhD guide Dr. G. L. Sharma. He always listened to me and provided everything in terms of encouragement, support, boost and a familial environment in the lab. This thesis would not have been possible without his guidance, inspiration, persistent help and a lesson to “meet deadlines”. He showed me the path of hard work and truth. His philosophical and practical advice always helped me to follow this tough path with ease. I will forever remember his constant moral support, informal and open discussions, deep thinking, critical analysis, judgments and valuable suggestions that has been my great source of strength throughout my doctoral work. I will definitely try to emulate his transparent style of conducting things and applying the outcome for the benefit of all. He always wanted me to stand nearest to perfection because in this world “no one is perfect”, we can only put our hardest effort to reach perfection. I must say that these are the golden words of my Sharma sir.

I am highly indebted to Dr. V. K. Gupta, Professor, Department of Biochemistry, Kurukshetra University, Kurukshetra, I am happy to mention that luckily I have got the opportunity of registration with him for my PhD. Cooperative and helping attitude is always a reflection of his personality. Simplicity, amazing depth of objective, knowledge, experience, practical skills and unerring decisions navigated me through the diplomatic controversies waves of an uncharted sea.

I would also like to thank Prof. S. K. Brahmachari, D.G. CSIR (ex Director, IGIB) and Dr. Rajesh S Gokhale, Director, IGIB for providing the necessary facilities.

I express my sincere thanks to Prof. Dogra, Chairperson and other teachers of Department of Biochemistry, Kurukshetra University, Kurukshetra for their constant help and support.

I would like to express my sincere thanks to Dr. M. A. Qadar Pasha for his constant encouragement and critical suggestions.

I feel deeply acknowledged to Das Sir and Mam, Dr. K. C. Gupta, Dr. Mrs. Pasha, Dr. B. Ghosh, Dr. A. B. Singh, Dr. Yogendra Singh and Dr. Naveen Arora for their constant support and encouragement.
