Chapter 1: Introduction and review of literature 1-37

1.1 Model for biological membranes 1
1.2 Membrane proteins 2
1.2.1 Integral membrane proteins 2
1.2.2 Extrinsic proteins 3
1.3 Membrane lipids 4
1.3.1 Classification of membrane lipids 4
1.3.2 Membrane carbohydrates 6
1.4 Chemical properties of phospholipids 7
1.5 Lipid polymorphism 8
1.5.1 Organized structures formed by lipid-water system 8
1.5.2 Molecular basis of lipid polymorphism 10
1.6 Lipid dynamics 10
1.6.1 Motional modes 11
1.6.2 Motional behavior of phosphatidylcholines 12
1.6.2.1 Dynamics in the liquid crystalline phase 13
1.6.2.2 Dynamics in the gel phase 14
1.7 Phase transitions 15
1.7.1 Factors affecting phase transition temperature 16
1.8 Asymmetry of membranes 19
1.9 Lipid-protein interactions 21
1.9.1 Electrostatic binding 22
1.9.2 Electrostatic and hydrophobic binding 23
1.9.3 Hydrophobic binding 24
1.10 Phospholipases 25
Chapter 1: Lipid molecules and functions

1.10.1 Interaction with phospholipase A₂
1.11 Lipid-transfer proteins
1.12 Translocases
1.13 Lipoproteins
1.13.1 High density lipoproteins
1.13.2 Apolipoprotein A-II
1.14 Basis of the present work

Chapter 2: Chemical synthesis of phospholipids

2.1 Materials
2.2 General methods
2.3 Chemical synthesis of phospholipids
2.3.1 Preparation of rac-1,3,4-butanetriol PC
2.3.2 Preparation of L(-) isomer of 1,3,4-butanetriol PC
2.3.3 Preparation of fluorescent-labeled phospholipid analogs
2.3.3.1 Preparation of fluorescent-labeled PC analogs
2.3.3.2 Preparation of fluorescent-labeled PS analogs
2.3.3.3 Preparation of fluorescent-labeled PE analogs
2.3.4 Preparation of miscellaneous compounds
2.3.5 Isolation and purification of egg PC
2.3.6 Preparation of glycerophosphatidylcholine
2.3.7 Preparation of lyso PC
2.4 Results and Discussion

Chapter 3: Phospholipase A₂-phospholipid interactions

3.1 Introduction
3.2 Materials and methods
3.3 Results
3.4 Discussion

Chapter 4: Aminophospholipid translocase-phospholipid interactions

4.1 Introduction
4.2 Materials and methods
4.3 Results
4.4 Discussion

Chapter 5: Human apolipoprotein A-II-phospholipid interactions
5.1 Introduction
5.2 Materials and Methods
5.3 Results and discussion
