ACKNOWLEDGEMENTS

With profound sense of gratitude I wish to convey my sincere thanks to my supervisors - Dr. S. S. Bhasin, Professor, University Centre of Instrumentation and Microelectronics, Panjab University, Chandigarh and Dr. P. B. Mahapatra, Professor, Mechanical Engineering Department, Punjab Engineering College, Chandigarh for their technical guidance, sound advice, excellent supervision and ever available help during the entire course of this work.

I extend my sincere thanks to Dr S C Laroiya, Director and Dr S S Banwait, Professor & Head, Mechanical Engineering Department, National Institute of Technical Teachers' Training and Research, Chandigarh for providing me with necessary hardware and software required for conducting this research work.

I am indebted to my dear wife, Mandeep, who had to face many hardships due to my preoccupation with this work. Without her untiring support, this work would not have been possible. Apologies are due to my sons, Amol and Angad, to whom I could not devote the amount of time they deserved, because of my involvement in this work. I gratefully acknowledge the support and immense help rendered by my parents, parents-in-law, sister Maninder and nephew Kamaldeep. This work could not have been completed without their co-operation.

Thanks are due to my brothers-in-law Mr. Jasbir Singh (U.S.A.) and Mr. Amandeep Singh Bhullar (Canada) for helping me procure some of the technical literature pertaining to the present research work.

I extend my sincere thanks to all the authors whose research findings have been referred to in this work.

Finally, I thank the Almighty God for infusing in me the strength and intellect needed to carry out this work.

SUKHDEEP SINGH
