ACKNOWLEDGEMENT

Praise to Almighty who bestowed His choicest blessings on me in achieving this milestone.

The completion of this thesis is the result of the efforts of many people who were directly involved with me from the initial stages onwards. I am therefore, indebted to all those who have helped me during this long voyage.

My vocabulary fails to express my profound gratitude to my ideal teacher, motivator, and source of inspiration, enlightenment and supervisor Prof (Dr.) (Mrs.) Vidhhu Mohan, for her support, cooperation, encouragement and painstaking supervision throughout the course of my research to help me realize my childhood dream. Her brilliant guidance, rigorous supervision and constructive criticism was a constant source of inspiration. She combines in her the rare qualities of Head and Heart. In all modesty and fairness I submit that the conception as well as culmination of this academic journey is owing to her proficient and dynamic guidance. Being her understudy was indeed a privilege and a matter of pride for me.

My special gratitude is due to Dr. (Mrs.) Surjeet Patheja, my mother and my mentor, who helped me with her unique blend of critical wisdom and loving contribution of time. She being an under research of my revered supervisor, sowed the seed of this research work in my mind, and stood like a pillar of support by my side.

My sincere gratitude to Dr. (Mrs.) Rita G. Singh Principal Govt. Home Science College Chandigarh, for her support, encouragement and for providing me with the necessary facilities to enable me to pursue my research.

I am deeply indebted to Dr. (Ms.) Suman Verma, (Dr.) (Mrs.) Sudha Katyal and Dr. (Mrs.) Reetinder Kaur for acquainting their constructive suggestions and support in carrying out the work.

My work would not have seen light of the day without the co operation of Shantanu, who helped me in identifying the sample and the Sahara patients, at Saket, New Delhi for their cooperation and patience.
I gratefully express reverence to my parents in law and sister in law for their love, cooperation and encouragement. Their support in taking care of my daughter Biba Ibadat, at the cost of their own comforts, made the completion of this piece of work possible. I am deeply indebted to my husband, Tony Ji, who was a constant source of moral boosting, and kept my spirits buoyed up whenever, I momentarily got overwhelmed by the enormity of the task and the temporary hurdles that came in the way.

I can not find appropriate words in expressing gratitude to my parents, for extending unlimited love, affection, blessings and encouragement at crucial junctures of my work. My thanks to brother Ramnik for his digs which led me to strive for accomplishment.

My profound gratitude to Dr. (Mrs.) Nindru Bal, Mr. Inderpreet Singh and Mr. Robin Singh, Dr. Pardeep Wasa, Mrs. Shashi Joshi, and Dr. (Mrs.) Reetinder Kohli for constantly coaxing me to finish my work, and for extending their valuable support in carrying out this piece of work.

My special thanks to Mr. Mahendra for helping in the statistical analysis of the Data. I am indeed grateful to Aslam, for undertaking the tedious job of typing and setting of this thesis with patience and care.
