ACKNOWLEDGEMENTS

I fumble for words to express my deepest sense of gratitude and indebtedness to my revered Supervisor, Dr. S.K. Taneja, Reader, Department of Zoology, Panjab University, Chandigarh for suggesting this problem, constant mature guidance, constructive criticism and valuable inspiration throughout the course of this study.

I am thankful to Prof. K.K. Tandon, Chairman and Prof. H.S. Vasisht, former Chairman, Department of Zoology, Panjab University, Chandigarh for providing me all the laboratory facilities to conduct the research work and their overall patronage.

My thanks are also due to Prof. S.S. Handa, former Chairman and Mr. K.K. Chakravorty, Research Associate, Department of Pharmacy, Panjab University, Chandigarh for their kind help in preparation of plant extracts.

I must place on record a deep sense of appreciation for unstinting help given to me by Miss Poonam, Miss Anupama, Miss Rashmi and Miss Gurbaksh and other laboratory colleagues who have always provided a congenial atmosphere.

I would never forget the sacrifices, encouragement and inspiration extended by my parents, wife and only daughter, braving difficulties posed by my absence from quite a distant place during the course of my studies in India.
I take this opportunity to thank all my well wishers and friends at home and abroad for lending their moral support and constant inspiration directly or indirectly throughout my stay in India.

Finally, I owe to the Ministry of Education, Government of Bangladesh and the Government of India but for whose sponsorship and financial help the present project would not have been a success.

(AZFAR AHMED)
Lecturer in Zoology
Govt. Edward College, Pabna
BANGLADESH.
