ACKNOWLEDGEMENTS

I acknowledge my deep and sincere gratitude to Dr. S. Badrinath, Director-Professor, Department of Microbiology, Medical Superintendent, former H.O.D, Department of Microbiology, Jawaharlal Institute of Postgraduate Medical Education and Research (JIPMER), for his able guidance, constant encouragement throughout the study period and for allowing me to carry out this study in the department.

I thank Dr. R. Sambashiva Rao, Director-Professor, Department of Microbiology and Director, JIPMER for his help and guidance rendered to me especially during the early study period.

I thank Dr. S. C. Parija, Professor of Microbiology and Head of the Department, for all his help.

I am greatly indebted to Dr. George Thomas, Deputy director, SPIC science foundation, Chennai, for his kind permission to carry out certain molecular typing methods in Department of Microbiology, SPIC science foundation, Chennai.

I wish to acknowledge with thanks, the generous help extended to me by Dr. P. Gerner-Smidt, Head, M.D., D.Sc. (med.), Department of Gastrointestinal infections, Statens Serum Institut, Copenhagen S, Denmark in providing me reference strains of Acinetobacter spp., reprints of important works that were carried out by him including his thesis and software programme required for the calculation of the discriminatory index.

I wish to thank Dr. Philippe J. M. Bouvet, Deputy director, Institut Pasteur, Cedex 15, Paris, for his kind help in providing me reference strains and reprints of important works that were carried out in his lab.

I am greatly indebted to Dr. Satisfy Irmo Amarnath, Senior consultant, Manipal hospital, Bangalore for his many helpful discussions related to the molecular epidemiological work discussed in this thesis. I express my deep sense of gratitude for his inspiration and practical solutions that were needed during this study.
I wish to thank Professor Dr. S. Jayachandran, H.O.D and Registrar, Department of Biotechnology, Pondicherry University, for his kind permission to carry out certain methodologies in his department.

I express my sincere thanks to Dr. Reba Kanungo, Professor, Department of Microbiology, JIPMER, for her constant encouragement and valuable suggestions rendered to me during the course of this work.

I also want to express my deep thanks to Dr. Vijayalakshmi N., Demonstrator, Department of Microbiology, JIPMER, for her encouragement and for stimulating discussions, which has helped me a lot.

I wish to thank Dr. S. Sujatha, Dr. B.N. Harish, and Mr. M.K. Natarajan, Department of Microbiology, JIPMER, for their help and guidance during the study period.

My special thanks to my Ph.D. colleague’s Mr. Raghava Potula, Miss Geethalatha, Mrs. Rajalakshmi for their help and encouragement rendered to me during this study period.

I acknowledge with thanks the warm help extended to me in times of need by the past and present residents of the Department of Microbiology. I wish to thank all the staff members of the Department of Microbiology, JIPMER, for their help and co-operation.

I wish to thank Sri Sukumaran Nair, Stenographer, Department of Microbiology, JIPMER, for his kind help rendered to me during the course of the study.

I wish to thank Dr. Akshaykumar Mishra for his kind assistance in statistical analysis.

I am grateful to Mr. Prabagar, Mr. M. Bidharam, Department of Biotechnology, Pondicherry University for their help and encouragement.
I wish to thank Mr. Senguttuvan and Miss Guejalatchumi for their computing assistance in preparing the thesis in various stages and bringing it to the present form.

I also want to express my deep thanks to Mrs Kalavati, Miss Rajalakshumi and Mr Ravindran, the family that has helped me in every way to complete this task.

I wish to thank Mrs Wheetha Hopper, Group leader, Department of Microbiology, SPIC science foundation, Chennai, for her help during my SPIC stay. I am grateful to Mr. Boney Kuriakose and Mr. Rajeshweran, research fellows, SPIC science foundation, Chennai, for their moral support and constant help that helped in bringing best out of me.

My special thanks to Dr. Jayakeerthi, Department of Microbiology, for helping me in various ways during the study period.

I wish to thank Dr. Somanth Megalamani and Dr. Kaviraj Udupa, of Department of ENT & Physiology respectively for their kind help and support.

I am extremely thankful to my friend Dr. Ravi D, Department of ENT for his kind help and moral support during the period of this work.

I would like to thank my brother Ravindra K for his constant help and inspiration that made it possible to complete this task.

I would like to thank all the Respiratory Intensive Care Unit staff members and patients of RICU and other hospital wards for their help and kind co-operation that made this work possible.

Finally, I want to thank my soul mate Dr. Madhavaranga M.P., Department of Ophthalmology, who understood me completely, cared deeply and had been the immense and impulsive force behind me. This work would not have been possible without his moral and emotional support.

Prashanth.K
