Pursuing a Ph.D. project is both a painful and enjoyable experience. It’s just like climbing a high peak, step by step, accompanied with bitterness, hardship as well as encouragement and trust. Now, when I have reached the top, enjoying the beautiful scenery, I realize that it was actually a teamwork that helped me reach here. Mere words cannot bind the flood of emotions. Though only my name appears on the cover of this thesis, a great many people have contributed to its production.

First and foremost, I thank God for the wisdom and perseverance that he has been bestowed upon me during this research project, and indeed, throughout my life: "I can do everything through him who gives me strength."

I am immensely pleased to place on record my profound gratitude and heartfelt thanks to my supervisor, Dr. Shyam Kumar, Professor Department of Physics, Dean Research & Development, Kurukshetra University Kurukshetra for his kind supervision, enthusiastic encouragement and invaluable guidance. I had the privilege and honor for me to pursue my Ph. D. studies under his guidance and direction. His logical understanding, wide knowledge, commitment, perpetual energy and enthusiasm in research are always motivating for me and for all his advisees.

I owe my deepest gratitude to Professor S. C. Mishra, Chairman, Department of Physics, K.U. Kurukshetra for providing necessary research facilities in our Department. It is an honor for me to express my sincere thanks to all the faculty members of the Department of Physics, K. U. Kurukshetra, for their invaluable advices and kind cooperation.

I am grateful to Dr. Amit Roy, Director, Inter University Accelerator Center, New Delhi, for providing the access to Low Energy Ion Beam Facility (LEIBF). My sincere thank goes to Dr. D. Kanjilal and Dr. S Chopra for their scientific suggestions and helpful remarks. Thank are due to Dr. Pravin Kumar and Mr. U.K. Rao for their help during implantation.
I warmly acknowledge Professor Ajay Gupta, Director, UGC-DAE-CSIR, Indore for providing the access to FTIR and Raman facilities. Thanks are due to Dr. S. Sripathi, Dr. V. Sathe and Mr. Manoj Kumar for their help and valuable suggestions during the measurements.

I would fail in my duties if I don’t acknowledge the support rendered to me by Dr. Sneh Lata Goyal, Guru Jambheshwar University of Science and Technology, Hisar. This work would not have taken its shape without your help M’am.

My appreciation goes to all the non-teaching staff of the Department of Physics for their kind cooperation during my research period.

It gives me a feeling of immense pleasure to pen down my feelings for my friends who have made each day a new experience for me at the Department of Physics. I would like to express my hearty appreciation to my colleagues and friends especially Suman Mahendia, Neetu Munjal, Kalpana Sharma, Vijay Kaushik, Praveen Kumar Goyal, Anil Tomar, Rishipal Chahal, for their invaluable support and help over the years of my Ph.D. My heartfelt thank goes to all the research scholars in our department for making a helpful environment in the department.

Where would I be without my family? This thesis would not have been possible without the unconditional love, support and care of my parents-in-law Mr. Sadhu Ram Goyal and Mrs. Anita Goyal. You have not only shown me the way to success, but you paved the way to make my journey as easy as possible. To thank you as much as you deserve would take the rest of my life.

I feel special saying “Thank you” to someone who has been so nice and wonderful. Undoubtedly it’s you, Sh. Naveen Goel ji, my dear husband. I couldn’t have achieved this without your support. Actually, I should thank God for creating such a lovely person and sending him to me. Thank you for everything.
This work would remain incomplete without the mention of two little angels of my life, my sweet little princesses Anika and Avika. “Thanks” is such a small word for their contribution in this work. Mumma thanks you both for sharing your mum with her books. All I can say is “I Love you both more than I love myself”.

I fell short of words in expressing my gratitude to my father Sh. Prakash Narain Gupta who supported me all through in my good times and bads. There was not a single day when I didn’t think of my mother (Lt.) Smt. Bimla Gupta to whom I dedicate this work. It was her dream which took a shape today. How can I forget my grandparents (Lt.) Sh. Shiv Narain Gupta and (Lt.) Smt Angoori Devi from whom I have inherited the desired level of patience and zeal to study.

No choice of words will suffice to adequately register my regards for my utmost wellwishers, my sisters-in-law Shivani and Meenal with Deepak jijaji and Ankit (my brothers-in-law). Being with you gives a sense of immense pleasure to me. My sisters Poonam and Pooja with Munish jijaji, and Ravi; my brother Manoj and bhabhi Payal; you people always encouraged me and supported me all the way. Thanks to all of you.

The colours of my life, my nephews Rishabh, Shubham, Akshay, Aayush and little Darsh; my little niece Swasti, the sweet smiles on your faces used to took all the tensions away and fill me with new energy. Thanks a lot for being in my life and making it so special.

Last but not the least; I would like to thank all my school and college friends who made my expedition to education so cheerful.

In humble gratitude

(Renu Gupta)
