Acknowledgement

I feel greatly honored to express my deep sense of gratitude and appreciation for my supervisor, Dr. Madhuri S. Rishi, Assistant Professor, Department of Environment Studies, Panjab University, Chandigarh. Her wide knowledge, dynamic supervision, zealous co-operation, logical way of thinking and encouraging behavior has been of great value for me and provided a good basis for the present thesis. I could not have imagined having a better advisor and mentor for my Ph.D study. I am deeply grateful to my co-supervisor, Prof. Naresh Kochhar, C.A.S. in Geology, Panjab University, Chandigarh for his detailed review, constructive criticism and excellent advice during the preparation of this thesis.

I owe my most sincere gratitude to Dr. R. Jindal, Chairman, Department of Environment Studies, for providing all the necessary facilities to carry out the present research work. It is a pleasure to thank Prof. R.K. Kohli and Prof. A.S. Ahluwalia for the help and assistance they provided in the early years of my doctoral tenure. My warm thanks are due to all the teachers in the department for their kind support and guidance which have been of great value in this study.

I would like to express my humble gratitude to Professor G.S. Gill, Chairman, Department of Geology, Panjab University, Chandigarh, for providing laboratory facilities. I am especially thankful to Professor Veena Dadhwal, Incharge of Geo-Chemical Laboratory, Department of Geology, for all the co-operation and help rendered by her during the lab work.

I am grateful to Shri P.J.S Dadhwal, Member Secretary, Chandigarh Pollution Control Committee for allowing me to undergo training on methods and techniques of chemical testing of water samples in their laboratory. I would also like to thank Shri Vivek Pandey (Scientist B) and Shri Ramesh Mishra (Chemist) from the same department for their help and support provided during this training.

It is an honor for me to express my sincere gratitude to Dr. S.C. Dhiman, Chairman, Central Ground Water Board, New Delhi for allowing me to use their library and laboratory facilities. My sincere thanks are also due to Mr. S. Marwaha, Mr. Jyoti Kumar, Mr. Sanjay Pandey and Ms. Rachana Bhatti from the same department for their unconditional help and sharing of knowledge to make me understand various concepts of hydrogeology.
I owe my deepest gratitude to Dr. S. Chibber, Department of Microbiology, Panjab University Chandigarh, for his assistance in carrying out microbial testing of water samples.

This thesis would not have been possible without the help of all my colleagues and Nibedita, Sandeep, Parul, Ranjana, Venu, Renu, Neelem, Prema, Tenzin, Raj Kumar, S and Rupinder, who contributed their valuable assistance in one way or another. I am in all of them for always supporting me through the ups and downs in the course of completing the present research work.

My deepest gratitude goes to my parents for their unflagging love and support throughout my life. They have been my greatest strength and their constant inspiration and guidance focused and motivated throughout my research tenure. The constant love and support from my brother, Kulpreet and my sisters, Preeti and Sana is sincerely acknowledged. I am thankful to my in laws for their co-operation and blessings. I would like to thank my husband Capt K. for the constant support and inspiration provided by him especially in the final phases of research.

The Junior and Senior Research Fellowship granted by the Indian Council of Medical Research, New Delhi for carrying out my research programme is duly acknowledged.

Finally, my greatest regards to the Almighty for bestowing upon me the courage to face the complexities of life and complete this project successfully.
