4.19. Quality of Groundwater based on Piper Trilinear Diagram
4.20. Inter ionic relationships between different ions
4.21. Results of heavy metal Analysis of Groundwater
4.22. Drinking water standards for heavy metals
4.23. Surface water sampling locations
4.24. Results of surface water analysis
4.25. Values of SAR, RSC and %Na in surface water samples
4.26. Sodium Hazard classes based on USSL Classification
4.27. Salinity Hazard Classes based on EC values
4.28. Surface water quality based on RSC (Residual Sodium Carbonate)
4.29. Sodium percent Water Class for Groundwater.
5.1. Detail of industrial areas
5.2. Classification of industries based on pollution potential
5.3. Multiple category industrial mix in the BBN area
5.4. Details of industries at Nalagarh and Baddi
5.5. Number of industrial units with and without ETP’s
5.6. Locations of the industrial effluent samples collected from the study area
5.7. Results of industrial effluent analysis
5.8. Different parameters against their minimum and maximum values in industrial effluents
