ACKNOWLEDGEMENT

To acknowledge the guidance, help and assistance of all those who remained involved in bringing this thesis to its final shape is a stupendous task, as no words can express adequately the true feelings of indebtedness and greatfulness of the author.

The excellent guidance and expert criticism mixed with a singularly untiring help of the teacher guides, Dr.H.M.Dani and Dr.R.C.Bansal, extended so affectionately and abundantly with a rare emotional involvement in steering this work through, has been a life time experience for the author.

The author is immensely pleased to record his heartfelt thanks to Dr.Gurinder Singh, Mr.S.Ojha, Dr (Mrs) Ravi Kiran and Dr.R.P.Sharma for their help failing which this endeavour could not have been completed.

Besides paying a tribute to his beloved wife, the author is extremely thankful to the spouses of his colleagues for having borne so patiently their working at odd hours during the final stages of this work. Lastly, the author is also indebted to the State of India for having provided the necessary facilities and funds for this study.
