LIST OF TABLES

TABLE NO. 1
Shows the Distribution of study Participant according to their age group  
(Page No.144)

TABLE NO. 2
 Shows the Distribution of study Participants according to classes  
(Page No.145)

TABLE NO. 3
Shows the distribution of Study Participants According to different schools in Marathwada region (Page No.146)

TABLE NO. 4
 Shows the region wise distribution of study participants (Page No.147)

TABLE NO. 5
 Shows the morphological Parameters of Study Participants (Page No.148)

TABLE NO. 6
 Shows the status of deformity in study participants (Page No.150)

TABLE NO. 7
 Shows the percentage of participants with respect to degree of deformity (Page No.151)

TABLE NO. 8
 Shows the percentage of participants with respect to single deformity, multiple deformity and total deformed and normal posture (Page No.153)
TABLE NO. 9
Illustrates the distribution of postural deformity found according to the age groups (Page no.154)

TABLE NO. 10
Illustrates the distribution of postural deformity found according to the class (Page no.155)

TABLE NO. 11
Illustrates the percentage of postural deformity in different types of schools in Marathwada region of Maharashtra (Page no.156)

TABLE NO. 12
Shows the percentage of prevalence of postural deformity in different district in Marathwada region of Maharashtra (Page No.157)

TABLE NO. 13
Shows the percentage of postural each deformity in samples in Marathwada region of Maharashtra (Page No.159)

TABLE NO. 14
Shows the comparison of agility between normal posture and deformed posture participants (Page No.161)

TABLE NO. 15
Shows the comparison of explosive leg strength between normal posture and deformed posture participants (Page No.162)

TABLE NO. 16
Shows the comparison of explosive leg strength between normal posture and deformed posture participants (Page No.163)
TABLE NO. 17
Shows the comparison of agility between kyphosis deformity and normal posture participants  (Page No.164)

TABLE NO. 18
Shows the comparison of explosive leg strength between kyphosis deformity and normal posture participants  (Page No.165)

TABLE NO. 19
Shows the comparison of speed between kyphosis deformity and normal posture participants  (Page No.166)

TABLE NO. 20
Shows the comparison of agility between scoliosis deformity and normal posture participants  (Page No.167)

TABLE NO. 21
Shows the comparison of explosive leg strength between scoliosis deformity and normal posture participants  (Page No.168)

TABLE NO. 22
Shows the comparison of speed between scoliosis deformity and normal posture participants  (Page No.169)

TABLE NO. 23
Shows the comparison of agility between bow legs deformity and normal posture participants  (Page no.170)

TABLE NO. 24
Shows the comparison of explosive leg strength between bow legs deformity and normal posture participants  (Page no.171)

TABLE NO. 25
Shows the comparison of speed between bow legs deformity and normal posture participants  (Page no.172)

**TABLE NO. 26**
Shows the comparisons of agility between knock knee deformity and normal posture participants  (Page no.173)

**TABLE NO. 27**
Shows the comparisons of explosive leg strength between knock knee deformity and normal posture participants  (Page no.174)

**TABLE NO. 28**
Shows the comparisons of speed between knock knee deformity and normal posture participants  (Page no.175)

**TABLE NO. 29**
Shows the comparison of agility between flat foot deformity and normal posture participants  (Page no.176)

**TABLE NO. 30**
Shows the comparison of explosive leg strength between flat foot deformity and normal posture participants  (Page no.177)

**TABLE NO. 31**
Shows the comparison of speed leg strength between flat foot deformity and normal posture participants  (Page no.178)
