ACKNOWLEDGEMENTS

I wish to express my deep sense of gratitude and indebtedness to my revered teacher, Dr. H. M. Dani, Ph.D. (Pb), Ph.D. (London), Chairman, Department of Biochemistry, Panjab University, Chandigarh (India) for suggesting the problem. It would not have been possible for me to submit this thesis in the present form without his sagacious guidance, valuable suggestions, constant encouragement, stimulatory discussions, constructive criticism, everlasting affection, which inspired me to bring the thesis in hand to completion.

My sincere thanks are due to Mr. M. M. Gupta, Mr. B. S. Khongwir, Mr. T. C. Bhalla, Miss Renuka Gupta, Miss Sneh Ahuja, Miss Vibha Gupta and Miss Deeksha Sharma, my laboratory mates, for their constant encouragements and day to day help during my research work.

My sincere thanks are also extended to Mr. G. P. Wadhwa, Mr. A. K. Sharma, Mr. Y. K. Sharma and Mr. Kuldip Singh for their unqualified support and co-operation as well as to other colleagues who have helped me in one way or the other during the whole tenure of investigations.

I express my heartfelt gratitude to my mother, elder brother and sister for providing congenial atmosphere and whole hearted support during my studies.
I would be failing in my duty if I do not express my gratefulness to the University Grants Commission for providing me the financial assistance in the form of fellowship for pursuing my research work.
