Acknowledgement

It is my pleasure and privilege to record my deep appreciation of the help and encouragement extended by a number of individuals during the course of the work reported in this thesis.

I take this opportunity to express my deepest sense of gratitude and appreciation to Dr. Sandip K. Basu, my thesis supervisor, for initiating me into the rigour, fascination and excitement of science. I am deeply indebted to him for his valuable suggestions, benign guidance and sustained encouragement throughout my doctoral studies.

I am extremely grateful to Dr. G.C. Mishra, Dr. G.C. Varshney, Dr. T. Chakraborti, Dr. R.M. Vohra and Dr. Amit Ghosh for their constructive criticisms and helpful suggestions. My heartfelt thanks and deepest sense of appreciation are owed to Mr. R.K. Srivastava for his cooperation and assistance in carrying out many of these experiments.

My colleagues at IMTECH extended their unhesitating cooperation during my tenure. I feel pleasure in expressing my admiration for the pleasant company of my friends Archana, Alok, Arvinder, Venugopalan, Navneet, Vinay, Mamta and Sunil. I am also thankful to Mr. Chetan Premani for his help in using the computer and to Mrs. S. Batra for patiently extending her typing skills in the preparation of the manuscript through its multiple revisions.

I express my everlasting gratitude to my husband Dr. Amitabha Mukhopadhyay for his constant encouragement, constructive criticisms, helpful suggestions and cooperation which helped me to transform my dream into reality. I am deeply grateful to my parents, in-laws and sisters for their constant encouragement, silent support and
considerable self-denial which helped get through difficult times.

This work was supported by the Council of Scientific and Industrial Research through the award of fellowship to me.

Bratati Chakrabarti.
