ACKNOWLEDGEMENT

I express my deep sense of gratitude to my supervisor, Professor K.N. Sareen, Ph.D. (Zürich), Head of the Department of Biochemistry, Panjab University, Chandigarh, (now retired), for his guidance, constant encouragement and constructive criticism throughout the course of this study.

I shall never be able to express how much I owe to Dr. M.K.P. Amma, Ph.D., Reader in Biochemistry, Panjab University, Chandigarh, for her painstaking efforts, constructive criticism and valuable suggestions during the present study.

I also extend my cordial thanks to Dr. H.M. Dani, Ph.D. (Pb.), Ph.D. (London), Reader in Biochemistry, Panjab University, Chandigarh, for his cooperation.

My sincere thanks are due also to Dr. Mahanti, Associate Professor of Haematology, Institute of Postgraduate Medical Education and Research, Chandigarh, for her suggestions and the laboratory facilities in connection with the haematological work reported in this thesis, and to Dr. B.R. Sharma, Director, Forensic Science Laboratory, U.T., Chandigarh, for allowing me the use of the Carl Zeiss UV-VIS Recording Spectrophotometer, Specord, for taking the spectra of the various fractions of the fortificant depicted in this thesis.

I wish to thank S/Shri B.S. Kataria, B.S. Cheema, S.V. Alekar, and B.D. Jaidka for their help in typing and the drawing and the photostat work in connection with the preparation of the thesis.

Lastly, thanks are due to the Panjab University, Chandigarh, for appointing me as Research Scholar-cum-Demonstrator in the Department of Biochemistry, during the tenure of which the above Ph.D. work has been carried out.

Harsh Sahney
