APPENDIX I

Cooking conditions for preparation of kraft pulps from mixture of woods and mixture of grasses.

1. **Mixed wood kraft pulp**
   
   Active alkali concentration - 17-18% (on dry weight basis)
   
   Temperature - 170°C
   
   Time taken to reach given temperature (170°C) - 1 hour
   
   Time for which held at given temperature (170°C) - 2.5 to 3 hours

2. **Mixed grass kraft pulp**
   
   Active alkali concentration - 11-12% (on dry weight basis)
   
   Temperature - 155°C
   
   Time taken to reach given temperature (155°C) - 45 minutes
   
   Time for which held at given temperature (155°C) - 3 hours
