ACKNOWLEDGEMENTS

With immense pleasure, I express my feeling of gratitude, indebtedness and reverence to my mentor Dr. Akhtar Mahmood, Reader, Department of Biochemistry, Panjab University, Chandigarh (presently Visiting Professor, Washington University, Medical School, St. Louis, USA) for his exceptionally versatile guidance, keen interest and persistent encouragement which helped me a long way in bringing this work to completion. The untiring help provided by Dr. J.P. Nagpaul, particularly in giving final shape to this manuscript, is gratefully acknowledged.

I owe my profound thanks to Dr. R.C. Bansal, Chairman, Department of Biochemistry, Panjab University, Chandigarh for providing me with necessary facilities in the department.

My sincere thanks are due to Mr. Virender M.S. Jaswal for willingly extending his much-needed help from time to time during the entire course of my Ph.D. His meticulous efforts and thoughtful discussions helped me a lot in completing this study. A special note of thanks is due to my other lab mates, Jyotdeep, Meenu, Harjit and Madhu, who went out of their way to cooperate with me in this venture. It was indeed a pleasure working with them.

The cheerful assistance and encouragement of all my friends especially Anju, Renu, Jaspreet, Latif, Mohini, Neeroo & Anjali is highly appreciated.

I am thankful to Dr. N.K. Ganguly, Chairman, Department of Experimental Medicine, PGIMER, for allowing me to use β-counter in the department.
Thanks are also due to all the faculty members and non-teaching staff of the department who cooperated with me at all times in this endeavour.

The fellowship offered to me by the Council of Scientific and Industrial Research, New Delhi, is gratefully acknowledged.

To my parents, brother and sisters, I owe more than I can express. Their moral support, silent sacrifices and good wishes sustained me during the course of my study.

REENA GUPTA
