ACKNOWLEDGEMENTS

It has been an exhilarating experience to work with Dr. D.V. Datta, Associate Professor and Head of Hepatology, Postgraduate Institute of Medical Education and Research, Chandigarh, whose ablest guidance, benevolent attention and fathomless affection has been a lighthouse of inspiration to me throughout the course of experimentation and preparation of this manuscript.

I express my gratitude to my revered teacher and guide, Dr. N. Nath, Reader and Head of Biochemistry, Panjab University, Chandigarh, who has guided me and spared his valuable time in helping me during all the stages of this work.

I am highly indebted to Dr. V.S. Mathur, Associate Professor of Pharmacology, Postgraduate Institute of Medical Education and Research, Chandigarh, who has so patiently and kindly helped me at every step during the writing of this thesis. His zealous interest and liberal help has been available to me at all stages from planning of work till its completion.

I am grateful to Dr. C.R. Nair, Assistant Professor of Gastroenterology (Biochemistry), Postgraduate Institute of Medical Education and Research, Chandigarh, for his timely suggestions and constructive criticism.
I offer my sincere gratitude to Dr. A. Koshy, Lecturer in Hepatology, Postgraduate Institute of Medical Education and Research, Chandigarh, for his kind help, guidance and valuable suggestions as regards the investigations.

I thank all concerned residents of Medicine department of Postgraduate Institute of Medical Education and Research, Chandigarh, for their help and co-operation.

I owe my thanks to the department of Morbid Anatomy for providing me with facilities for carrying out the histopathological examinations.

Financial assistance provided by Indian Council of Medical Research is gratefully acknowledged.

Last, but not the least, my sincere thanks to all the patients who were included in this study, without whose co-operation this work would have been impossible.

(Ajeshwar Pal Singh Narang)
