ACKNOWLEDGEMENT

This is the part in the Thesis that I am very happy to write without any boundation of pre-requisites, norms etc.… and overall with a very peaceful mind, not just like writing the chapters in this thesis with tense mind.

First of all I would like to thank ‘GOD- the almighty’ for blessing me and gave me the patience, tolerance and courage to complete my final ladder of my PhD studies with this thesis and put me to the 50% part of the people who as per the study of Kurup and Arora, the total number of students who enroll for a PhD only 50% end up completing their thesis. I always believe in dream- ‘a dream you dream alone is on a dream, a dream you dream together is a reality’- JOHN LENNON. So, this thesis would never have been completed without the dream of my father, mother, wife, brother and my beloved sister and off-course my in-laws and their moral support altogether.

In research study, as we know, choosing a good mentor/guide is the most crucial factor in the successful outcome and timely completion of the thesis, on this front, I made a perfect choice. I would like to express my gratitude to my supervisor Dr. Deba Prasad Panda, Associate Professor, who was always equally passionate and has shown amazing patience and diligence in assisting me to produce this thesis.

I would like to sincerely thank my Dad for immense morale support and encouragement throughout my study period not only to complete my PhD but since my first step to the school. “Yes DAD, I m proud of being your son”. Sincerely thanks from core of my health to my younger brother ‘Pradeep’, who went to Qatar to earn for the family as let me continue my PhD study behind. ‘I m proud to get you my brother’. My sister ‘Bunu’ and MUM were always a supportive and encouraging throughout the period of study.

At home, finally I would like to express my deep gratitude to my wife ‘Jun’. I would never have been able to complete this work without her serenity, her understanding and tolerance, and her sacrifices during the course of study. “Thank you Jun, for the countless moments of encouragement and support during my lows in study period and taking care of our little angle ‘ANWESHA’ in absence of me for almost one and half year since her birth”. My Love for Anwesha, as she missed the needed moments of tender love of a father in her infancy, because I could not be with her side in period of study.
I would also like to thank all my in-laws especially father-in-law and elder sister-in-law, who were always in my support throughout the period for my study. I would also like to thank Kartu and his family to support and care for ANWESHA in my absence.

This work would not have been possible without the responses I received to both the questionnaire and the interviews. My thanks go to all the respondents who contributed to the research especially those who agreed to be interviewed.

I would like to thank Dr. D.D. Agarwal, VC, Dr. Reecha Ranjan Singh & Dr. Manish Sharma, Management Department from JJT University for their help and valuable comments time to time to improve the quality of the thesis.

I would also like to thank Lakshminarayan Meena, Narshing Meena, Badri Meena from Jaipur, Sandeep Agarwal from Noida, Rajita Goswami from Itanagar, D.K. Dhir from IISASTR, Delhi, Jacob Mays from SPSSvideotutorial.com, Dr. Ali Nasef from Tripoli University Lybia, Rabiu Ado, Research Scholar from Aberdeen UK, Library Rajiv Gandhi University Itanagar, Library IBS Hyderabad, Library JJT University and all DPMs of Arunachal Pradesh for their support and off course other supporting staffs of JJT University who use to be cordial and always helpful in the event of need during entire period of my stay in the University.

Though if I forget to note you down here, do not think that I m not thankful to you, but it’s just a slip of mind. Thank you, thank you all for your constant support.

Gangaram Biswakarma
