## CONTENTS

| Acknowledgement                               | i - iii          |
| List of Tables                                | iv – vii         |
| List of Charts                                | viii             |
| Acronyms                                      | ix – x           |
| Contents                                      | xi - xiv         |

### CHAPTER 1 – INTRODUCTION

1.1. Introduction
1.2. Energy and Economic Development
1.3. Energy: the global scenario
1.4. The Nuclear Power
1.5. Development of electrical energy
1.6. Power sector: Issues the world over
1.7. Specific issues in the power sector of developing countries
1.8. Indian Scenario
1.9. Kerala: Problems and characteristics
1.10. Objectives of study
1.11. Hypotheses of the study
1.12. Approach and Organisation of the study
1.13. Notes and References

### CHAPTER II – REVIEW OF LITERATURE

2.1. Notes and References

### CHAPTER III - POWER DEVELOPMENT IN INDIA – AN OVERVIEW

3.1. Introduction
3.2. Review of energy development

3.2.1. Energy Resources

3.3. Energy Supply

3.4. Power Sector: Evolution and Growth

3.4.1. Capacity addition during plan periods

3.4.2. Power generation

3.4.3. Energy productivity (MU/MW)

3.5. Power consumption

3.5.1. Analysis of sector wise consumption

3.5.2. Demand Elasticities

3.5.3. Sector wise Per capita Consumption, Consumers and Connected load

3.6. Demand supply deficit

3.7. GDP Energy relationship

3.8. Financial status of SEBs

3.9. Conclusion and Recent policy changes

3.10. Notes and References

CHAPTER IV - THE POWER SYSTEM OF KERALA: EVOLUTION & GROWTH

4.1. Introduction

4.2. Growth of Power Projects

4.3. Analysis of Power System Variables (Supply side)

4.3.1. Installed Capacity

4.3.2. Maximum Demand

4.3.3. Generation

4.3.4. Energy Sales
4.3.5. T&D loss
4.3.6. Distribution lines
4.3.7. Transformers
4.3.8. Growth rate of power system variables on the supply side

4.4. Demand side analysis
4.4.1. Power Consumers
4.4.2. Connected Load
4.4.3. Per capita consumption and actual consumption per capita
4.4.4. Growth of variables on the demand side

4.5. Trends in revenue, expenditure, and agricultural connection
4.5.1. Agricultural connections
4.6. Growth rates of revenue, expenditure and agricultural connections
4.7. Conclusion
4.8. Notes and Reference

CHAPTER V - ISSUES IN THE POWER SYSTEM OF KERALA:
A TECHNOC ECONOMIC ANALYSIS

5.1. Installed Capacity
5.2. Performance analysis of generating stations
5.3. Analysis of Plant Load Factor (PLF) of power stations
5.4. Energy productivity of hydel stations
5.5. The Reliability Analysis
5.5.1. The Load Factor
5.5.2. Diversity Factor and Demand Factor
5.6. Transmission and Distribution Loss
5.6.1. Inadequate Lines and Substations
5.7. Economic efficiency: the role of pricing
5.7.1. Pricing method in Kerala- an over view
5.7.2. Tariff structure of Kerala power system
5.8. Conclusion
5.9. Notes and References

CHAPTER VI - SECTORAL DEMAND FOR ELECTRICITY 191 - 213

6.1. Introduction
6.2. Sector wise Analysis of Connected Load
6.3. Sector wise analysis of consumption
6.4. Sector wise Analysis of Consumers
6.4.1. Analysis of consumption per actual power consumer
6.4.2. Growth rate of connected load, consumption and consumers
6.5. Consumption per connected load
6.6. GDP Energy Elasticity
6.7. Demand forecast for sub sectors
6.8. Notes and Reference

CHAPTER VII – SUMMARY AND CONCLUSIONS 214 - 228

7.1. Summary of major findings
7.2. Policy suggestions

BIBLIOGRAPHY 229 - 238
