LIST OF FIGURES

1.1 Schematic representation of structure of molecular transitions.

1.2 Progressions and Sequences.

2.1 Energy level diagram of CH molecule

2.2 – 2.12 Rotational fine structure of P branch of (0-0), (1-1) and (2-2) bands of A^2Δ-X^2Π system of CH.

2.13 – 2.24 Rotational fine structure of (0-0) and (1-1) band of B^2Σ-X^2Π system of CH.

2.25 – 2.29 Rotational fine structure of (0-0) band of C^2Σ-X^2Π system of CH.

2.30 Determination of rotational temperature from P branch of (0-0) band of A^2Δ(5/2)-X^2Π(3/2) System of CH.

2.31 Determination of rotational temperature from R branch of (0-0) band of A^2Δ(5/2)-X^2Π(3/2) System of CH.

2.32 Determination of rotational temperature from P branch of (0-0) band of A^2Δ(3/2)-X^2Π(1/2) System of CH.

2.33 Determination of rotational temperature from R branch of (0-0) band of A^2Δ(3/2)-X^2Π(1/2) System of CH.

2.34 Determination of rotational temperature from P branch of (1-1) band of A^2Δ(5/2)-X^2Π(3/2) System of CH.

2.35 Determination of rotational temperature from R branch of (1-1) band of A^2Δ(5/2)-X^2Π(3/2) System of CH.

2.36 Determination of rotational temperature from P branch of (1-1) band of A^2Δ(3/2)-X^2Π(1/2) System of CH.

2.37 Determination of rotational temperature from R branch of (1-1) band of A^2Δ(3/2)-X^2Π(1/2) System of CH.

2.38 Determination of rotational temperature from P branch of (2-2) band of A^2Δ(5/2)-X^2Π(3/2) System of CH.

2.39 Determination of rotational temperature from R branch of (2-2) band of A^2Δ(5/2)-X^2Π(3/2) System of CH.

2.40 Determination of rotational temperature from P branch of (0-0) band of B^2Σ-X^2Π System of CH.
2.41 Determination of rotational temperature from R branch of (0-0) band of \( \text{B} \, ^2\Sigma - \text{X} \, ^2\Pi \) System of CH.

2.42 Determination of rotational temperature from Q branch of (0-0) band of \( \text{B} \, ^2\Sigma - \text{X} \, ^2\Pi \) System of CH.

2.43 Determination of rotational temperature from P branch of (1-1) band of \( \text{B} \, ^2\Sigma - \text{X} \, ^2\Pi \) System of CH.

2.44 Determination of rotational temperature from Q branch of (1-1) band of \( \text{B} \, ^2\Sigma - \text{X} \, ^2\Pi \) System of CH.

2.45 Determination of rotational temperature from P branch of (0-0) band of \( \text{C} \, ^2\Sigma - \text{X} \, ^2\Pi \) System of CH.

2.46 Determination of rotational temperature from R branch of (0-0) band of \( \text{C} \, ^2\Sigma - \text{X} \, ^2\Pi \) System of CH.

4.1(a) RKR, D-Z, Modified Zavitsas, H-H, Extended Rydberg and Zavitsas potential curves for ground state of CH molecule

4.1(b) Percentage deviation of RKR, D-Z, Modified Zavitsas, H-H, Extended Rydberg and Zavitsas potential curves for ground state of CH molecule.

4.2 (a) RKR potential curve for ground state of CH molecule.

4.2 (b) Reduced Potential curve for ground state of CH molecule.

4.3 (a) RKR Potential curve for ground state of SiH molecule.

4.3 (b) Reduced Potential curve for ground state of SiH molecule.

4.4 (a) RKR Potential curve for ground state of GeH molecule.

4.4 (b) Reduced Potential curve for ground state of GeH molecule.

4.5 Combined Reduced Potential curve for ground state of CH, SiH and GeH Molecule.
