List of Figures

Figure 1.1 FDI inflows, global and by group of economies, 1995-2013 and projections, 2014-16 (Billions of dollars)
Figure 1.2: The dynamic of top-down–bottom-up processes across levels of culture
Figure 1.3: Spillover vs. Crossover effect between work and family domain
Figure 1.4: Final pie of clusters (96 countries) at three levels
Figure 2.1 Multiple Stakeholder View of Expatriate Adjustment
Figure 2.2 Literature review coverage under two classifications
Figure 2.3 Pictorial representation of work family border theory
Figure 2.4 Framework of International Adjustment
Figure 2.5 Person-Environment-Correspondence Model
Figure 2.6 Hypothesized Model-01 based on relationship between predictors and outcomes
Figure 2.7 Hypothesized Model-02 based on indirect effect of predictors on mediators and effect of mediators on outcomes
Figure 4.1 Scree Plot based on eigenvalue for research objective-01
Figure 4.2 Confirmatory factory analysis for Research objective-01
Figure 4.3 Common latent factor test on CFA for research objective-01
Figure 4.4 Path modeling for the research objective-01 (Direct effect)
Figure 4.5 Interaction effect among multiple exogenous variables
Figure 4.6 Effect of spouse support on life satisfaction with social ties as moderator
Figure 4.7 Effect of LMX on work adjustment with social ties as moderator
Figure 4.8 Scree Plot based on eigenvalue for research objective-02
Figure 4.9 Confirmatory factory analysis for Research Objective-02
Figure 4.10 Common latent factor test on CFA for research objective-02
Figure 4.11 Path modeling for the research objective-02 (Indirect effect)
Figure 4.12 Interaction effect among Spouse Support and Social Ties
Figure 4.13 Path modeling based on direct and indirect effect
Figure 4.14 Pictorial representation of hypothesized model-01
Figure 4.15 Pictorial representation of hypothesized model-02
