List of Tables

Table 1.1  A summary of the properties and differences between the rods and cones  8

Table 3.1  Computation of Modulation for different apodization parameters over the entire range of spatial frequencies under both coherent and incoherent incident illumination  63

Table 3.2  Computation of Modulation for different apodization parameters over the entire range of spatial frequencies ($\omega$) under coherent incident illumination  64

Table 4.1  Comparison of properties for Spatial Light Modulators made of $\text{BR}_{96N}$ film, Nematic liquid crystals (LC SLM) and ferroelectric liquid crystals (FLC SLM)  82

Table 6.1  Clinical data for glaucoma patients (Left Eye & Right Eye)  105

Table 6.2  Clinical Characteristics of patients with retinitis pigmentosa  109

Table 6.3  Cone density in each region in eyes with retinitis pigmentosa vs. normal eyes  110
